ABSTRACT

The American federal system that allows for competition between the states for corporate charters have led to the preeminence of the "liberal" corporate laws of the State of Delaware. Nowadays, over forty percent of all New York Stock Exchange listed companies are incorporated in Delaware and eighty-two percent of all firms that reincorporate do so in Delaware.

This is the result of a historical process. During the nineteenth century the American corporations evolved from a "concession" granted by the state as a special privilege, to a "contract" created and performed by agreement among private parties. Corporations received broader powers to achieve their objectives, and managers predominated in corporate governance at shareholders' expense.

The process has continued during the twentieth century. The state corporate law revisions have represented a movement towards "liberality" that has posed serious questions: Has the balance between shareholders' protection and managers' discretion been broken? Is federal intervention required to restore that balance?

However, the development of the "liberal" corporate law of Delaware and other states has been balanced by the active role of the federal powers. The Supreme Court doctrine on the "interstate clause" that authorizes federal intervention on corporations doing interstate commerce is the basis of the federal legislation enacted during this century on matters of national interest.

Delaware creates no new law, but is reforming the current system and replacing it with some form of federal regulation in order to provide shareholders with adequate protection against managers. Delaware's defenders believe that the current system promotes the development of optimal state law and the change should not be forced by federal legislation.

But even if the current system in Delaware there is a political constraint on the distribution of competence between the federal and state levels, and of the varied degrees of federal and state intervention in business associations. Thus the critique of Delaware's corporate law is a critique of the federal system.

Le système fédéral américain qui permet la compétition entre les états pour l'obtention des chartes des sociétés commerciales a conduit à la reconnaissance des lois de compagnies de l'état du Delaware, reconnues comme "super loi". Actuellement, plus de quarante pourcent de toutes les

compagnies transigées au "New York Stock Exchange" sont incorporées au Delaware et plus de quatre-vingt-deux pourcent de celles qui se "réincorporent" le font au Delaware.

Ce phénomène est le résultat d'un processus qui a pris naissance au siècle dernier. Pendant cette période, les compagnies américaines passèrent d'une simple concession octroyée par l'état à un contrat créé et exécuté par différentes parties. Les compagnies reçurent des pouvoirs accrus leur permettant d'atteindre leurs objectifs et les dirigeants prédominèrent dans la gestion aux dépens des actionnaires.

Le processus s'est poursuivi au vingtième siècle. Chaque amendement des lois du Delaware a représenté un mouvement vers le libéralisme et a soulevé d'importantes questions. Est-ce que l'équilibre entre la protection des actionnaires et la discrétion des dirigeants a été affecté? Est-ce qu'une intervention fédérale est nécessaire pour rétablir cet équilibre?

Pourtant, le développement des lois des compagnies du Delaware et des autres états a toujours été contre balancé par le rôle actif de l'autorité fédérale. La doctrine de la Cour Suprême concernant la clause de commerce entre les états, qui autorise l'intervention fédérale auprès des corporations faisant affaires dans plusieurs états, est la base de la législation fédérale du vingtième siècle qui fut décrétée pour des raisons d'intérêt national.

Les détracteurs du Delaware recommandent de réformer le système actuel et de le remplacer par une réglementation fédérale de façon à mieux protéger les actionnaires des dirigeants. D'autre part, les défenseurs du Delaware affirment que le système actuel promeut le développement optimal de lois des états et ne devrait pas être modifié.

La controverse entourant le Delaware est l'expression d'un conflit politique sur la distribution des pouvoirs entre les autorités fédérales et les états, et sur l'intervention du gouvernement auprès des sociétés commerciales. La critique des lois des compagnies du Delaware est donc une critique du système fédéral.

PREFACE

The nineteenth century competition between the states for corporate charters has had varied effects on American corporate law. This paper is an analysis of some of them and, in particular, of the most famous one: the Delaware corporate law, which has been considered the most influential in the United States since the beginning of this century.

Many reasons justify this assertion. Over forty percent of all the companies listed on the New York Stock Exchange are incorporated in Delaware and eighty two percent of all firms that reincorporate do so in Delaware. Over two hundred of the **Fortune** 500 largest industrial corporations are also incorporated in Delaware. Most of these are multinational or multistate corporations with a home base in a financial or industrial center located outside Delaware. "

What are the reasons for this success? From the legal point of view the reasons would likely be sought in Delaware corporate law itself. Under

" See H. V. S. E. Guide (CCH) at 725-789 (Jan. 31, 1986).

from this perspective one might embark on any of three types of studies: a- a comparative law study between Delaware corporate laws and the corporate laws of western countries of similar economical and financial development; b- an analysis of the Delaware law concerning issues crucial to the relations among creditors, shareholders and managers (e.g. directors' fiduciary duties and shareholders rights); c- a comparative study of the statutory provisions and judicial decisions of other American states, to establish the different levels of "laxity" or "strictness."

The present paper adopts a combined approach and also intends to go beyond the formal rule structures. On one hand, it is a summary and analysis of the famous controversy about the origin and outcome of the Delaware corporate law and its impact in the corporate law of the United States. On the other hand, it analyzes certain features of the Delaware law, and their judicial constructions in order to assess the contenders' arguments and the reasons, if any, for Delaware's success.

Since the U.S. Constitution provided the basic frame for the development of American corporate law, and for the competition among the states for corporate charters, this paper considers the implications of certain constitutional provisions and amendments, and its construction by the Supreme Court.

Together with the historical account of the Delaware role in the American corporate law, this paper deals with Delaware's rules on

incorporation and reincorporation, shareholder rights, fiduciary duties of directors, managers and controlling shareholders, takeovers and mergers and derivative actions. Thus this study intends to integrate the constitutional framework of the relations between the federal system and corporate law with issues of substantial importance in corporate governance. It makes reference to four important corporate codes (California, Illinois, New York and Texas). Such references were made taking into account the peculiarities of the American federal system and the common law tradition.

Such a comparative law context allows us to situate Delaware corporate law in national perspective. It is an attempt to confirm or reject certain hypotheses about Delaware since the succinct exposition of isolated statutory provisions or judicial decisions does not afford any conclusion about the position of a corporate law in a federal system, particularly when both are constantly evolving.

A study like the present is delimited by the convergence of historical and juridical elements, that is to say, of the impact of politics and economics in the development of legal institutions: lawyers and historians that analyze the same facts may diverge on their meaning; political scientists and economists may find different cause-effect relations. Even when the conclusions are the same, the rationale for them is different. However, lawyers should be conscious of their limitations in political or economic analyses, and historians should be careful in dealing with legal matters.

Thus the controversy on Delaware corporate law is affected by political or economical evaluations of the different elements of a legal system. Nevertheless, although any legal system is influenced by political struggles or economic structures, it has its own autonomous dynamism. Law is science by itself and it has its own principles and methods. Moreover, law has an important group of people working permanently on it, legislators, judges and lawyers. Their opinions and interests have to be considered.

CORPORATIONS AND THE CONSTITUTION

1- INTRODUCTION

American law followed the tradition of English law about corporations and accepted the principle that they are created by the government:¹ corporations were not collectivities of citizens but instruments of the State. Since the question was what organ of the State should grant charters of incorporation, the Constitution and its amendments seemed to settle the question:

"The Congress shall have power . . . : 3 To regulate commerce with foreign nations and among the several states and with the indian tribes . . . 18. To make all Laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in

¹ A. Berle, *Historical Inheritance of American Corporations* (New York: N.Y. U. School of Law, 1950) at 189.

the Government of the United States, or in any Department or Officer thereof." ²

"The powers not delegated to the United States by the Constitution, nor prohibited to the states, are reserved to the states respectively or to the people." ³

"Full faith and credit shall be given in each State to the public Acts, Records, and judicial Proceedings of every other state

And Congress may by general Laws prescribe the manner in which such Acts, Records and Proceedings shall be proved, and the effect thereof." ⁴

The states received the power to grant corporate charters, without prejudice of the powers of Congress to regulate the operations of corporations doing interstate commerce. Furthermore, the Constitution prevented the states from repudiating charters granted by other states and permitted Congress to regulate the effects of those charters. ⁵

The balance between federal and state levels of government embodied in the Constitution arose from several different proposals at the Constitutional Convention: Congress received a jurisdiction delineated in specific powers expressed in broad terms. ⁶

² U.S. Cons. Art. I, sec. 8.

³ U.S. Cons. Amen. X (1791).

⁴ U.S. Cons. Art. IV, sec. 2.

⁵ Note, "Federal Chartering of Corporations: Constitutional Challenges" (1972) 61 Geo. L. J. 123 at 125.

⁶ The Convention endorsed a resolution that the national legislature should have power "to legislate in all cases for the general interests of the Union, and also in those to which the states are separately incompetent, or . . . in which harmony of the [United] States (continued...)

The "necessary and proper" powers clause became the central issue for advocates and opponents of a strong federal government, although its meaning was clarified by the same framers. A Hamilton and J. Madison argued that this clause was not the embodiment of a distinct power but rather an appropriate means for executing the express powers conferred upon the federal government, a power that would be implied if not otherwise provided.⁷

Nevertheless, Congress power to regulate interstate commerce was construed variously. While some argued that it was not an indefinite jurisdiction but a specific authority to accomplish certain objectives, most commentators agreed that the commerce clause covered "problems which were not specifically provided for by other constitutional provisions."⁸

It is not strange that corporations and charters soon became a matter of conflict between defenders and enemies of federal interventionism and that the U. S. Supreme Court had given shape and focus to the limits implied in the clauses of the Constitution in order to balance state and federal powers on corporations.

II - BALANCE BETWEEN STATE AND FEDERAL POWERS: DEVELOPMENT OF THE INTERSTATE CLAUSE

A POWERS OF STATE LEGISLATURES

The Court defined the powers of state legislatures concerning existent corporations in the case of *Dartmouth College v. Woodward*.⁹ On that occasion it held that the constitutional prohibition against state impairment of contracts protected a corporation's charter against alterations ordered by the state legislatures. Corporations were seen as artificial entities having only those powers conferred upon them by their charters, either expressly or implicitly.¹⁰

The critical problem, however, was not the border between the legislatures' powers and the corporations' rights, but between the federal and state government's powers to regulate corporations. In *Gibbons v. Ogden*,¹¹ a case involving an attempt by New York to limit navigation in its waters, the Court observed that the power of Congress to regulate interstate commerce could prevent a state from regulating trade within its own borders, if that regulation affected interstate commerce. Thus, federal regulation of corporations doing interstate commerce would be sustained if the constitution provided no specific

⁹ 17 U.S. (4 Wheat.) 518 (1819).

¹⁰ *Ibid.* at 634

¹¹ 22 U.S. (9 Wheat.) 1 (1824).

prohibition against congressional regulation of the activity and the activity involved more than one state. ¹²

The Court revised this doctrine in **Mayor of New York v. Miln** ¹³ and in **Cooley v. Board of Wardens of the Port of Philadelphia** ¹⁴ where it stated that congressional power over interstate commerce would be deemed exclusive only in those areas which by their nature demanded national regulation. Hence, areas which did not demand such regulation were included in the legislatures' powers.

B- REGULATIONS ON FOREIGN CORPORATIONS

One problem was to determine if the states could limit or control the activities of "foreign corporations," i.e., corporations chartered by other states. The Court in **Bank of Augusta v. Earle** ¹⁵ held that corporations chartered by one state were not "citizens" of that state, entitled to claim the constitutional protection of Art. IV, sec. 2¹⁶ against other states' laws. Although the court went on to say that it would presume an intended comity among the states, which would allow a

¹² Ibid. at 194-96.

¹³ 36 U.S. (11 Pet.) 102 (1837)

¹⁴ 53 U.S. (12 Howard) 299 (1851).

¹⁵ 38 U.S. (13 Pet) 519 (1839).

¹⁶ "1. The Citizens of each State shall be entitled to all Privileges and Immunities of the Citizens in the several states."

foreign corporation to make a contract there, it acknowledged that certain state restrictions would be upheld.

Forty years later the Court settled the issue in *Paul v. Virginia*.¹⁷ Then the question was whether a state could impose restrictions on foreign insurance companies, when parallel restrictions were not imposed on domestic insurance companies.

The Supreme Court upheld the power of the state to do so on two grounds: a) a corporation was not a citizen of any state and therefore was not entitled to the non-discriminatory treatment that the privileges and immunities clause of the Fourteenth amendment¹⁸ guaranteed to citizens; and b) the sale of insurance in a state market was not a transaction involved in interstate commerce.

While on its face the decision looked as though it preserved the power of states, its effect was the opposite. A state could exclude or admit on condition a foreign corporation interested in engaging in intrastate commerce but that state could not exclude or admit on condition a foreign corporation doing interstate business.¹⁹ Only the federal

¹⁷ 75 U.S. (8 Wall.) 168 (1869).

¹⁸ ". No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."

¹⁹ H. Henn, *Handbook of the Law of Corporations and other business Enterprises*, 1970 at 19.

government had the power to regulate corporations involved in interstate commerce.

With this doctrine the Court established the balance between federal and state intervention on multistate -and soon multinational- corporations. Even if a state decided to regulate the activities of its own corporations, the doctrine did not allow it to intervene in the activities of corporations chartered by other states. Therefore state restrictions would not prevent a corporation from doing business in the state, but would only cause it to seek its charter (and pay its taxes) elsewhere. Moreover, restrictive state corporate laws would have the effect of placing a state's chartered corporations at a competitive disadvantage with corporations chartered in states with more permissive corporate laws.²⁰

III- TOWARDS A NEW BALANCE: EVOLUTION IN CONSTITUTIONAL DOCTRINE ON CORPORATIONS

In a series of decisions between 1874 and 1934 the Supreme Court held different economic regulations invalid because of perceived encroachments on constitutional rights. The states and the federal governments should be confined in their inability to enact regulations

²⁰ H. Scheiber, "Federalism and the American Economic Order, 1778-1910" (1975) 10 Law & Soc'y Rev. 57 at 62.

on corporations activities. The Court was concerned with the principle of "laissez-faire" more than with the federal-state balance of powers,
21

A- THE TENTH AMENDMENT DOCTRINE AND ITS DEMISE

Thus, the tenth amendment was invoked to impede federal intervention on corporations doing interstate commerce and in some cases the Supreme Court accepted this contention. In *Hammer v. Dagenhart*,²² it invalidated a congressional enactment intended to prevent interstate commerce.

"[T]he maintenance of the authority of the states over matters purely local is as essential to the preservation of our institutions as is the conservation of the supremacy of the federal power in all matters entrusted to the nation by the Federal Constitution."²³

"If Congress can thus regulate matters entrusted to local authority by prohibition of the movement of commodities in interstate commerce, all freedom of commerce will be at an end, and the power of the states over local matters may be eliminated, and thus our system of government practically destroyed."²⁴

²¹ W. Kirk, "A case study of Legislative opportunism: How Delaware used the federal-state system to attain corporate preeminence" (1984) J. Cor. Law 243 at 242.

²² 247 U.S. 251 (1918).

²³ *Ibid.* at 275.

²⁴ *Ibid.* at 276.

In *Hopkins Federal Savings & Loan Ass'n v. Cleary* ²⁵ the issue was the Home Owners' Loan Act of 1933 ²⁶ which allowed building and loan associations organized under state laws to be converted into Federal Savings and Loan Associations upon the vote of a majority of the stockholders, conversion not conditioned upon the consent of the state or compliance with state laws. The Court found that the provision was an unconstitutional encroachment upon the reserved powers of the states.²⁷

However with the consolidation of the New Deal, these decisions were soon overruled. ²⁸ The Court in *United States v. Darby* established the test for determining the distribution of powers between the federal and state levels in such a manner that if Congress regulates corporations which engage in interstate commerce, no Tenth Amendment problems should arise ²⁹

B- THE FIFTH AND FOURTEENTH AMENDMENT DOCTRINES AND THEIR DEMISE

In the cases of *Bank of Augusta* and *Paul* ³⁰ the Supreme Court held that the term "citizen" used in the privileges and immunities clause of section one of the fourteenth amendment and section two of Art. IV did

²⁵ 296 U.S. 315 (1935).

²⁶ Ch. 64, se. 5, 48 Stat. 132.

²⁷ *Supra* note 25 at 335.

²⁸ See *infra*

²⁹ Note, *supra* note 5 at 143.

³⁰ *Supra* note 15 and 17 and accompanying text.

not include corporations. Likewise, the term "person" as used in the fifth amendment's due process privilege applied only to natural persons, not to "fictitious persons" like corporations, according to the doctrine exposed in **Woodward**.³¹

These restrictive constructions were soon overruled. The term "people" as used in the fourth amendment encompassed corporations.³² Corporations were "persons" protected by the due process and equal protection clauses of the fourteenth amendment,³³ and the due process clause of the fifth amendment.³⁴ Corporations were given status as litigants and the ability to hold property and to do business outside their charter states.

At the end of the century the court dealt with the question of the extension of state and federal powers to "discriminate" between corporations. When it applied the fourteenth amendment analysis in a business and economic context, distinction between different kinds of corporations did not seem to violate the equal protection clause so long as it bore a rational relationship to a legitimate state interest.³⁵

³¹ **Hale v. Henkel**, 201 U.S. 43, 74 (1906).

³² **See v. Seattle**, 387 U.S. 541, 545 (1967).

³³ **WHYY, Inc. v. Borough of Glassboro**, 393 U.S. 117, 119 (1968) (equal protection); **Wheeling Steel Corp. v. Glander**, 337 U.S. 562, 574 (1949) (equal protection); **Connecticut Gen. Life Ins. Co. v. Johnson**, 303 U.S. 77, 88 (1938) (due process).

³⁴ **Union Pac. R.R. v. United States**, 99 U.S. 700, 719 (1879).

³⁵ **Railway Express Agency v. New York**, 336 U.S. 106 (1949).

Therefore, the Court has not invalidated every difference in treatment, rather only suspect classifications based on race, wealth, or religion are impermissible. ³⁶ The size of a business enterprise is permitted as criteria of discrimination between large and small entities, for purpose of federal or state legislation. ³⁷

During the first third of this century, the Supreme Court continued to impose fifth and fourteenth amendment restraints upon state and federal attempts to regulate corporations. ³⁸ In order to protect the "freedom of contract" the court insisted that corporations, like natural persons, were entitled to the equal protection ³⁹ and due process ⁴⁰ guarantees. However, with the beginning of the New Deal Era the Court abandoned its strict interpretation of the fifth and fourteenth amendments and refused to invalidate federal and state economic legislation solely on these constitutional grounds.

³⁶ *Hunter v. Erickson*, 393 U.S. 385, 392 (1969); *Loving v. Virginia*, 388 U.S. 1 (1967) [race]. *Tate v. Short*, 401 U.S. 395, 398-99 (1971); *Boddie v. Connecticut*, 401 U.S. 371, 388-89 (1971) [wealth].

³⁷ *Morley v. Doud*, 354 U.S. 457, 465 (1957); *Engel v. O'Malley*, 219 U.S. 129, 138 (1911).

³⁸ Between 1899 and 1937, 159 Supreme Court decisions held state laws unconstitutional under the due process and equal protection clauses. In addition, 25 statutes were invalidated under the due process clause coupled with some other constitutional provision. See Note, *supra* note 5 at 147.

³⁹ *Liggett Co. v. Lee*, 288 U.S. 517, 536 (1933)

⁴⁰ *Pierce v. Society of Sisters*, 268 U.S. 510 (1925).

"[The] function of the courts in the application of the fifth and fourteenth amendments is to determine in each case whether circumstances vindicate the challenged regulation as a reasonable exertion of governmental authority or condemn it as arbitrary or discriminatory." ⁴¹

IV FEDERAL PREVALENCE: NEW DEVELOPMENTS OF THE INTERSTATE CLAUSE

A INITIAL TESTS

In some cases the Court applied the "protective principle" according to which Congress should intervene in economy and business only to protect interstate commerce. In *Houston, E & W. Texas Ry. v. United States*, the Court held that Congress has power to regulate

"[a]ll matters having such a close and substantial relation to interstate traffic that the control is essential or appropriate to the security of that traffic, [its] efficiency, and [unmolested conduct] . . ." ⁴²

Such restrictive doctrines were abandoned soon, in accordance with new legislative tendencies. While before 1933 Congress had rarely legislated about corporations, ⁴³ the New Deal years brought federal legislation affecting corporations doing interstate commerce. The focus was

⁴¹ *Nebbia v. New York*, 291 U.S. 502 (1934).

⁴² *Ibid.* at 351.

⁴³ The most important federal regulation of corporation was the Interstate Commerce Act (Sections 5 (2), 20 and 20a). Those required the approval of the Interstate Commerce Commission for consolidations and security issues of any railroad or other company subject to the provisions of the act and also gave the Commission power to regulate accounting practices. (See W. Cary, & E. Eisenberg, *Cases and Materials on Corporations* 6th ed. (1986) at 13).

increasingly on corporations' behaviour rather than on their finances and structure. ⁴⁴

B- NEW DEAL LEGISLATION

Some enactments referred directly corporate finance and structure. The **Communications Act** ⁴⁵ (1934) gave a federal agency power over interlocking directorates and accounting practices in the communications industry. The **Federal Power Act** ⁴⁶ (1935) gave other federal agency powers over electric utility companies, including competence to regulate their securities transactions or dispositions of property. The **Civil Aeronautics Act** ⁴⁷ (1938) gave another federal agency powers over consolidations and mergers of air transportation companies and their accounting practices.

The acts administered by the Securities and Exchange Commission governed the registration, offering, and transactions on securities. The

⁴⁴ Some aspects of the corporate governance and activities had been previously regulated by the antitrust laws. The **Sherman Act** [15 U.S.C. s. 1-7.] prohibited any unreasonable interference, by contract, or combination or conspiracy, with the ordinary, usual and freely competitive pricing or distribution system of the open market in interstate trade. It was supplemented by the **Clayton Act**, [15 U.S.C. s. 12-27] that prohibited price discrimination, tying and exclusive dealing contracts, mergers, and interlocking directorates, where the effect may be substantially to lessen competition or tend to create a monopoly in any line of commerce (See also the **Robinson-Patman Act**, 15 U.S.C. S.13).

⁴⁵ 7 U.S.C. 1.

⁴⁶ 14 U.S.C 1.

⁴⁷ 52 Stat. 973.

Securities Act ⁴⁹ (1933) provides for registration of securities which are to be sold to the public and for complete information on the issuer and the stock offering. The **Securities Exchange Act** ⁴⁹ (1934) governs the operation of stock exchanges and over-the-counter trading and requires publication of information about stocks listed on these exchanges

Also relevant in corporate matters, the **Public Utility Holding Act**⁵⁰ (1935) seeks to restrict the operations of utility holding companies whose operations are integrated and confined to a single state or contiguous states. The **Trust Indenture Act** ⁵¹ (1939) protects investors in bonds by requiring that the trust indenture include protective clauses and exclude exculpatory clauses, and that trustees be independent of the issuing company ⁵²

C. NEW APPROACHES

Initially the Supreme Court found constitutional infirmities in this legislation. Its insistence upon protecting the states powers from encroachment by the federal interstate power resulted in a tightening of

⁴⁹ 15 U.S.C. s. 77a et seq.

⁴⁹ 15 U.S.C. s. 78 et seq.

⁵¹ 15 U.S.C. s. 14.

⁵² See also the **Investment Company Act** (1940) [15 U.S.C. s. 80a-1 et seq.] and the **Investment Advisers Act** (1940) [15 U.S.C. s.80b.].

the standards used to determine the permissible extension of the commerce clause.

For example, in **Schechter Poultry Corp. v. United States** ⁵³ the Court struck down the National Industrial Recovery Act of 1933, ⁵⁴ holding that only intrastate practices "directly" affecting interstate commerce were subject to federal regulation. ⁵⁵ In **Carter v. Carter Coal Co.** ⁵⁶ the Court voided some provisions of the Bituminous Coal Conservation Act of 1935, ⁵⁷ demanding that the effect should be "direct" and not only "indirect."

After 1936 the Court abandoned its restrictive interpretation of the interstate commerce clause. Upholding the National Labour Relations Act ⁵⁸ in **NLBR v. Jones & Laughlin Steel Corp.** ⁵⁹ the Court substituted the "direct effect" test for a wider "close and substantial relation" requirement. ⁶⁰

⁶⁰ *Ibid.* at 37.

"Although activities may be intrastate in character when separately considered, if they have such a close and substantial relation to interstate commerce that their control is essential or appropriate to protect that commerce from burdens and obstructions, Congress cannot be denied the power to exercise that control " ⁶¹

In *Wickard v. Filburn*, ⁶² upholding the Agricultural Adjustment Act of 1938, ⁶³ the Court spoke in terms of Congress' power to regulate "activity even if not regarded as commerce . . . if it exerts substantial economic effect on interstate commerce." ⁶⁴ Thus, the multiple effects of many seemingly insignificant acts could thus be held to add up to a substantial impact. ⁶⁵

In the last decades the Court has consistently applied the same doctrine. In *Heart of Atlanta Motel, Inc. v. United States*, ⁶⁶ the Supreme Court sustained the hotel accommodation provisions of the Civil Rights Act of 1964 ⁶⁷ as a valid exercise of federal commerce power.

"The power of Congress to promote interstate commerce also includes the power to regulate the local incidents thereof, including the local activities in both the States of Origin

⁶¹ *Ibid.*

⁶⁷ 28 U.S.C. 1447 (1970), 42 U.S.C. 1971, 1975 (a) - (d), 2000a to h-6 (1970).

and destinations, which might have a substantial and harmful effect upon commerce." ⁶⁸

In *Perez v. United States*, ⁶⁹ the Court faced the question of whether the Consumer Credit Protection Act of 1968 ⁷⁰ was a valid exercise of Congress' commerce power when applied to purely intrastate activities. It concluded that once the particular activity regulated or prohibited falls within the scope of the federal commerce power, there need not be proof that particular proscribed intrastate activity had an effect on interstate commerce. ⁷¹

VI - CONCLUSION

The evolution of the Supreme Court doctrines on the scope and effects of the "interstate clause" and other constitutional provisions, coupled with the federal legislation enacted during this century on matters of national interest have led to an increasing federal intervention on corporations doing interstate commerce. In the same degree that federal legislation augmented in number and importance, state legislation diminished in effects and significance. No longer could the states assume that their chartered corporations were only subjected to their corporate laws; on the contrary, corporations involved in interstate

⁶⁸ *Supra* note 66 at 258.

⁶⁹ 402 U.S. 146 (1971).

⁷¹ Note, *supra* note 5 at 151-155.

business were affected by the legislation of other states and by federal regulations.

The state powers on corporations were invoked to protect not only the states but also the corporations themselves against federal intervention. Thus, the fifth, tenth and fourteenth Amendments were invoked by the supporters of the "laissez faire" principle in order to circumvent the growing tendency towards federal regulation. Although the Supreme Court accepted this contentions for more than fifty years, at the time of the New Deal it adopted an approach consistent with the economic reality of the twentieth century: national corporations operating in a national market have to be regulated by national powers.

Although the internal governance of the corporate entity is still reserved to the chartering states, the external affairs of the corporation have been subjected to the overriding regulation of the federal Congress or federal agencies. State legislatures and courts have to take into consideration the impact of its statutes and decisions in a national perspective, since they affect not only corporations doing intrastate business but also corporations involved in interstate business.

II

CORPORATIONS AND THE STATES

I - THE SPECIAL CHARTERING SYSTEM

A- SPECIAL CHARTERS BY SPECIAL STATUTE

After the adoption of the Constitution the idea of corporations as franchises of the states made possible a process of incorporation by special charters. The legislature of each state issued all corporate charters one by one, by individual legislative acts. The special charter process did not seem awkward because in 1789 few corporations existed in the United States; probably no more than two dozen companies had been chartered by state legislatures during the Confederation period.⁷²

⁷² These corporations included banks, bridge and canal companies, trading and navigation enterprises, manufacturing and insurance companies. H. Butler, "Nineteenth-Century Jurisdictional Competition in the Granting of Corporate Privileges" (1985) 15 J. Leg. Stu. 129 at 138.

The idea of state franchise supposed that corporate status was only given for some state purpose, and for that reason many public utility companies received monopoly privileges and police powers in exchange for their financing and construction of quasi-public goods.⁷³ Sooner than later entrepreneurs demanded access to corporate status as an efficient manner to structure and finance business ventures of all types. The preamble of early manufacturing companies charters justified the acts of incorporation because the enterprises required more capital than could be obtained by traditional means.⁷⁴

However, in the first third of the nineteenth century state governments preferred to restrict their granting of charters to industrial and commercial associations. Several considerations about the inconvenience of unfettered "state franchises" led to a combination of permissive policy in granting special charters and restrictive policy concerning their terms. Some corporate privileges as perpetual succession and limited liability were not affirmatively granted by these early charters. The theory underlying that policy was that individual legislative sanction provided the necessary control and regulation of a new form of business associations.⁷⁵

However, limited liability was an important feature of a corporate association for the method of financing a corporation in the first half

⁷³ For example, eminent domain. Butler, *supra* note 72 at 139.

⁷⁴ Butler, *supra* note 72 at 139.

⁷⁵ *Ibid*

of the nineteenth century. The usual practice was to obtain a stock subscription on which only a small percentage was paid at the outset and then to assess the subscribers in order to meet future needs of the company. ⁷⁶

Common Law recognized the importance of limited liability. Before 1824 it was not clear whether a corporation necessarily included limited liability under the common law when the charter was silent about shareholders' obligations to creditors. However, after *Wood v. Dummer*⁷⁷ the courts settled the issue affirmatively.

B- SPECIAL CHARTERS AND GENERAL STATUTES

When the number of corporations increased in the first third of the nineteenth century, the passage of special charters and supplementary amendments occupied increasingly large portions of legislative sessions. For that reason, many legislatures passed general regulating statutes on corporations. These acts did not provide a procedure for incorporation different from the traditional one; instead they merely established the powers and limits applying to corporations created by special charter ⁷⁸

⁷⁶ Butler, *supra* note 72 at 139.

⁷⁷ 3 Mason 308, 311 (C.C.D. Me. 1824).

⁷⁸ W. Hurst, *Conditions of Freedom in the Nineteen Century United States* (1956) at 15.

By referring to the general regulating statutes, the special charters did not have to include such powers and limits. In practice, the passage of a special charter subject to the general statute involved the legislature filling out a form, adding a few details (the name of the corporation and its incorporators, and its capital stock). ⁷⁸

There were very few interstate corporations during this early development of the general corporation acts combined with special corporate charters. Incorporation in a state usually implied that the corporation would locate and operate in that state. Furthermore, the charters of this period generally required that the enterprise was located not only in the chartering state but also in a particular town.
 on

However, in the middle of the century it became more evident that the states wished to attract outside capital or prevent the flight of local capital. The state's political boundaries were ineffective barriers to capital flows when the economical and political expansion of the United States meant the creation of a coast-to-coast market, and the Supreme Court doctrines about the extent of state powers to regulate corporations doing interstate commerce.

II. DUAL SYSTEM FOR INCORPORATION: GENERAL AND SPECIAL CHARTERING

⁷⁸ Butler, *supra* note 72 at 140. A. Berle & G. Means, *The Modern Corporation and Private Property*, 1968 at 127-28.

⁸⁰ Butler, *supra* note 72 at 142.

A- PREVALENCE OF THE SPECIAL CHARTERS

Under this dual system of incorporation, it was possible to incorporate either by a general procedure under a general statute or by special charter. It seems that the first of such general statutes was enacted by New York in 1811. Nevertheless, general incorporation acts did not begin to predominate until near 1850, when states began to place constitutional restrictions or prohibitions to the use of special charters.

These general acts tended at first to be strict. A nearly universal feature was a limitation upon the maximum amount of authorized capital. Many states set low ceilings, and raise them one or more times in the last quarter of the century. ⁸¹

The early general acts usually set a limited number of purposes for which corporations could be formed. The power to incorporate for "any lawful purpose" was not common until the last decade of the century. The duration of corporations was also limited, usually to a period of twenty or thirty years. Besides, limits existed on the amount of indebtedness which could be incurred, and the power to hold the stock of other corporations. There was a widespread provision that until all capital

⁸¹ Ligett, (Brandeis, J. diss.) *supra* note 39 at 550.

was paid in, stockholders were liable for twice the par value of their shares.⁸²

The major difference between corporations formed by special charter and those formed under the general law was that the latter were smaller on average. The privilege of incorporation under the general acts was circumscribed with limitations and requirements that could be avoided by obtaining a special corporate charter.

It seems that a major difference between the terms of both charters related to the rules about directors' liability. Some of the general incorporation laws contained strict rules for directors' liability.⁸³ Almost all special corporate charters, on the other hand, were silent about directors' liability, and the common law did not hold, at that time, directors personally liable to creditors.⁸⁴

The terms of special charters included several other advantages and exemptions. Many of the general laws also required annual reports to be submitted not only to stockholders but also to a government agency; these requirements, could be avoided by securing special charters. Special charters allowed a company to escape the low limits on

⁸² L. Friedman, *A History of American Law* (1973) at 453.

⁸³ Butler, *supra* note 72 at 146.

⁸⁴ W. Cadman, *The Corporation in New Jersey, Business and Politics 1791 - 1875*, 1949 at 169.

capitalization or the total debt limits established in the general laws, and to obtain power of mortgaging property and issuing bonds. ⁸⁵

Special charters even gave an exemption from state and local taxes that were payable by firms that incorporated under the general laws and included the capacity to issue stock in exchange for property other than money. Lastly the special charters could be modified and amended to reflect the new opportunities in business and finance. ⁸⁶

It seems that two other conditions predisposed incorporators in favour of special charters, even when they contained nothing more than the same privileges as general incorporation charters. First, future legislatures could alter the general laws to restrict the advantages and privileges of all corporations formed under it, while it appeared less likely that the legislatures would pass many individual pieces of legislation to restrict the rights of specially chartered corporations, with the constitutional infirmities analyzed in *Dartmouth College*. Second, a special act of the legislature was important to business promoters because it added prestige to the company and aided in marketing the initial stock issue. ⁸⁷

B- DECADENCE OF THE SPECIAL CHARTERS

⁸⁵ Cadman, *supra* note 84 at 169

⁸⁶ Butler, *supra* note 72 at 147.

⁸⁷ Cadman, *supra* note 84 at 169-70

Between the late 1840s and the 1870s there was a growing concern for the burden that special charters placed on the legislators' time and on the state's budget by prolonging legislative sessions. It appears that the opportunities for lobbying had multiplied as the volume of special charters increased. Objections arose to the abuses of the special chartering system, specially in respect with the inequality of privileges and the granting of tax exemptions.

One of the typical responses to this political pressure and general criticism was to pass an act aimed at purifying the procedure of special chartering. For instance, some states required a two-thirds vote of the legislature for granting special charters.

At the same time the question raised of whether a corporation under special charter could do business outside the state of incorporation. Before the 1890s, it was either assumed or required that the operations of corporations under both special and general laws- would be confined to their chartering state. Beginning in the mid-1850s, the articles of special charters included a provision authorizing the corporation to carry on part of its business outside the state, although the intention was that the corporation's primary place of business would remain in the chartering state.⁸⁸

These provisions, coupled with the rules of comity announced by the Supreme Court in *Bank of Augusta*, allowed corporations chartered in the

⁸⁸ Butler, *supra* note 72 at 151.

state of their primary place of business to exercise their privileges in other places, subject to the regulations of the foreign state. The status of "foreign corporations" (corporations operating outside their state of origin) was uncertain and some corporations were hesitant to start their operations outside their state of incorporation. ⁸⁸

The practice of incorporating in a state other than the state of the primary place of business had its origins in this epoch. The situations varied. In most instances, the shareholders behind the incorporation were residents of the incorporating state; in some, however, the shareholders sought the special charters without regard to their residences or the location of the corporations's operations. ⁸⁹

Some restrictions prevailed in the corporate law of this period. Judges, for instance, held that all corporate acts which the legislature had not authorized would be prohibited. Such acts were held to be "ultra vires" or "beyond the powers," and the courts were reluctant to extend powers by implication. ⁹¹

Other rules protected creditors. Under the "trust fund doctrine" the capital stock of a corporation was deemed to be a trust fund for the protection of its creditors; they could recover their credits from a corporation's shareholders up to the par value of the shares. Under the

⁸⁸ Ibid.

⁸⁹ Butler, *supra* note 72 at 151-52.

⁹¹ Ibid. at 453.

"true value doctrine" the property exchanged for shares must be measured at its true value, and that this must equal, at least, the par value of the shares issued. ⁸²

III THE GENERAL CHARTERING SYSTEM

Beginning in 1845, however, the constitutional conventions of most states were concerned with eliminating the special charters. The effect of the restriction and prohibition of special acts was that legislatures had to pass general incorporation laws or to revise the existent ones, in order to regulate different aspects of corporate governance and activities. ⁸³

Successive developments varied. In New England, where general incorporation laws were available, special charters nonetheless still accounted for approximately one-third of the business incorporations in the decade before 1875. ⁸⁴ The demise of the special charter occurred in the decade beginning with 1875, although many New England states had not adopted a constitutional prohibition of special charters. ⁸⁵

⁸² L. Larcom, *The Delaware Corporation* (1973) at 78.

⁸³ Butler, *supra* note 72 at 153. The absolute prohibition of special charters was adopted in constitutional conventions that were called to revise the state's entire constitution; however, seven of the constitutions containing absolute prohibitions were the original constitutions of the states.

⁸⁴ Butler, *supra* note 72 at 159.

⁸⁵ In the nineteenth century Maine was the only state to adopt the prohibition. Friedman, *supra* note 82 at 456.

In other states, in spite of the constitutional restrictions and the general laws, legislators continued granting special charters invoking lacunae found in the respective constitution. For that reason some states abandoned their dual incorporation systems in favour of an absolute constitutional prohibition of special charters. Finally most of the legislatures stopped granting special charters around 1875.⁸⁶

This legal development were parallel to economical development. That process fostered the market integration and the creation of corporations doing interstate business for which the place or form of incorporation was indifferent. In the early nineteenth century, entry barriers created by geographic isolation resulted in spatial monopoly for local producers. As the century progressed, technological improvements in transportation and communication led to the development of a national economy of integrated markets.⁸⁷ The Supreme Court's decisions commented in section I of this paper recognized the process, allowing corporations a broader scope for interstate activities and protecting them from federal and state intervention.

IV THE CASE OF NEW JERSEY

⁸⁶ Butler, *supra* note 72 at 160.

⁸⁷ "The increased speed and certainty of distant transactions made possible by the telegraph network improved the functioning of extra-local markets and increased the feasibility of an integrated national economy." (Butler, *supra* note 72 at 154).

In the early part of the nineteenth century, the state of New Jersey followed the practice of chartering corporations only by special act. It passed its first general act in 1846.⁹⁸ From this year until 1875 it had the dual system of chartering, since the general act had not forbidden resort to special acts.

Entrepreneurs sought incorporation under special acts in order to overrule prohibitions or restrictions of the general act such as non-cash payment for stock, double liability on shareholders until all capital was paid in, issuance of bonds and mortgaging of corporate property, cumulative voting, majority of corporation directors being residents of New Jersey, etc.⁹⁹

Opposition to special acts increased through the 1860s along with the number of such acts passed, and in 1875 New Jersey joined other states and amended its constitution to prohibit chartering by special act.¹⁰⁰ The same year the legislature passed a general incorporation law. A few years later when the State experienced increasing financial difficulties the legislature imposed additional filing fees and annual franchise taxes upon all the corporations chartered in the state.¹⁰¹

⁹⁸ Cadman, *supra* note 84 at 115.

⁹⁹ Kirk, *supra* note 21 at 246.

¹⁰⁰ It was the first state in which this constitutional provision was adopted as an amendment to an existing constitution. Cadman, *supra* note 84 at 186.

¹⁰¹ Kirk, *supra* note 21 at 247.

The New Jersey general incorporation law of 1875, is the ancestor of modern incorporation laws. The procedure for incorporating was very simple; corporations could be formed without regard to the residence of the incorporators or the corporation's primary place of business. Directors might hold their meetings, have an office and keep the books outside the state. ¹⁰²

In 1887 James Dill (a New York corporation lawyer) and Leon Abett (former Governor of New Jersey) submitted to the New Jersey government a plan which New York had rejected. They proposed that the state "liberalize" its general corporation laws (i.e., make them attractive to incorporators); under the plan New Jersey would benefit from a substantial increase in revenues and the Corporation Trust Company of New Jersey would be organized to advertise the advantages of incorporating in New Jersey and to act as agents and handle the incorporation formalities for out of the-state incorporators. ¹⁰³

That plan received the backing of the Governor and legislature passed acts which allowed the corporations to buy, hold and sell the stock of any other corporation (1888); ¹⁰⁴ to do all the business outside of the state (1892); ¹⁰⁵ to be formed for any lawful purpose (1892), ¹⁰⁶ to

¹⁰² Butler, *supra* note 72 at 158

¹⁰³ Larcom, *supra* note 92 at 61.

¹⁰⁴ See 8 Del. C. 131.

¹⁰⁵ Ibid.

¹⁰⁶ See 8 Del. C. 102 [a].

gave the directors broad powers to increase or decrease the amount of capital stock, to change common stock to preferred stock, and to amend the charter (1896), 107 to ease promoters to pay for their shares with property (1896), 108

The success of the reform was evidenced by the number of corporations obtaining charters in New Jersey. In 1894 most of New Jersey's state corporations numbered by the hundreds of firms incorporated in New Jersey had previously incorporated in New York. Another measure of New Jersey's success was the imitation and movement in other states. Some states reacted by enacting legislation which was hostile to foreign corporations, other states joined New Jersey in a strategy of imitation. Among them Maine, West Virginia, Arizona and South Dakota. And Delaware.

V. THE STATE OF DELAWARE

A. DELAWARE'S PROBLEM WITH NEW YORK

In 1890 Delaware convention adopted a new constitution which affected corporations. The most significant amendments were the elimination of special charter for all business associations except banks, the

107 See also part of [redacted]

108 See Del. Corp. Act IX, sec. 3 Kirk, *supra* note 21 at 249.

109 Kirk *supra* note 21 at 250

abolition of the limit of twenty years for corporate duration and of the limited list of permissible corporate business. ¹¹⁰

To carry out a plan similar to that of New Jersey, under which a "liberal" incorporation law would be adopted, the legislature held a special session to enact a general corporation law. An act was drafted and passed in the 1898 session of the General Assembly. ¹¹¹

Some innovative features of this act, that remain in modern acts, were the following: a corporation came into being when its charter was filed with the secretary of state; the requirement of submission to a judge was eliminated; ¹¹² there was neither time limit for corporate existence nor an upper limit on capitalization; ¹¹³ Delaware companies could do business, have offices, and hold property outside the state if authorized to do so by their charters, ¹¹⁴ shareholder meetings could be held out of state if the corporation's by-laws allowed; ¹¹⁵ any Delaware corporation could buy, sell, hold, transfer, mortgage or otherwise dispose of the stock and bonds of other corporations of any state or nation; judgment of a corporation's directors would be presumed

¹¹⁰ Del. Cons. Art. XI sec. 3 et. seq. S. Arsh. "A History of Delaware Corporation Law" (1976) 1 Del. J. Corp. L. 1 at 4.

¹¹¹ E. Folk, *The Delaware General Corporation Law* (1972) at 571.

¹¹² 8 Del. C. 103 [c] [5].

¹¹³ 8 Del. C. 102 [b] [5], 242 [a] [3] Larcom, *supra* note 92 at 92.

¹¹⁴ 8 Del. C. 122.

¹¹⁵ 8 Del. C. 141 [g].

conclusive in their valuation of property exchange for stock, unless there was fraud in the transaction. ¹¹⁶

Nevertheless some restrictions subsisted: each corporation was required to maintain a resident agent in the state to make service of papers;¹¹⁷ for purposes of lawsuits, the stock of Delaware corporations would be deemed to exist in Delaware regardless of its actual location; the Court of Chancery could seize the stock to compel the appearance of its owner under penalty of forfeiture; ¹¹⁸ creditors could compel shareholders to pay up to the par value of shares subscribed by them; ¹¹⁹ dissenting shareholders were given the right to force the corporation to buy out their interests in the event of merger or consolidation ¹²⁰

Most of these provisions were borrowed from New Jersey's statute almost word by word but, as an additional advantage, Delaware's rates in the original filing fee and in the annual franchise taxes were lower. The results of Delaware's policy were not as immediate or spectacular as New Jersey's, but were conclusive. ¹²¹

¹¹⁶ 8 Del. C. 141 [c].

¹¹⁷ 8 Del. C. 132 et seq.

¹¹⁸ 8 Del. C. 163 et seq.

¹¹⁹ 8 Del. C. 162 [a].

¹²⁰ 8 Del. C. 262.

¹²¹ Larcom, *supra* note 92 at 18.

The judiciary construed the statute in harmony with its precedents. In *Wilmington City Ry. Co. v. People's Ry. Co.*,¹²² the Court of Chancery reasoned that the Delaware legislature, in adopting the language of the New Jersey Statute, had intended that Delaware courts adopt the New Jersey Courts' construction of the statute. The effect of this interpretation was to confer a level of certainty on a new statute that normally would have taken years of local litigation to develop.

Even today, the preeminence of Delaware is attributed to Delaware's well-developed body of judicial decisions on the meaning of virtually any provision that might be the subject of litigation.¹²³ Other part of the explanation for Delaware's success lies in the willingness of its legislature to modify its corporate statute as required to have an up-dated statute according to the necessities of corporations and incorporators,¹²⁴ in a short period of time.

Then in less than twenty years Delaware improved the "liberal" provisions of its statute in points crucial for corporate governance: directors, previously liable for illegal payments of dividends or reductions of capital, could only be held liable upon proof that the violation was willful or negligent (1911);¹²⁵ all the corporation's

¹²² 47 A. 245 (Del. Ch. 1900)

¹²³ Butler, *supra* note 72 at 162

¹²⁴ Larcom, *supra* note 92 at 167

¹²⁵ 8 Del. C. 141 [e].

directors were allowed to be non residents (1915); ¹²⁶ corporations could issue stock with no par value, and boards of directors could determine the adequacy of payment for it (1917); ¹²⁷ dividends could be paid from profits arising from any source, eliminating the requirement that profits arise from business (1917).

The evolution of the New Jersey corporate law fostered this tendency. As candidate for Governor of New Jersey in 1910 and for President in 1912, Woodrow Wilson had raised the issue of antitrust laws, making destruction of monopoly a keystone of his "New Freedom." On this issue his mentor was Justice Louis Brandeis, who afterwards became the author of the "Race to the Bottom" theory. ¹²⁸

After being elected President, he decided to pass antitrust acts while still being Governor. The "Seven Sisters," as the bills were called, outlawed attempts to create monopoly or suppress competition, and forbade the chartering of any new holding companies. Moreover, the acts provided that the directors of any corporation entering into agreements fixing prices or restricting competition could be fined \$1000 dollars or imprisoned three years or both. ¹²⁹

¹²⁶ 8 Del. C. 102 [a].

¹²⁷ 8 Del. C. 153 [b].

¹²⁸ "Companies were early formed to provide charters for corporations in states where the cost was lowest and the laws least restrictive. The states joined in advertising their wares. The race was not of diligence but of laxity". Ligett, *supra* note 52.

¹²⁹ Kirk, *supra* note 21 at 257.

Despite the serious concerns expressed by the business community about the effects of the measures, New Jersey legislature passed the bills in 1913. The reaction of incorporators against the state was immediate and drastic. New Jersey lost its position as incorporating state. When in 1917 the legislature repealed the statutes, meanwhile Delaware had consolidated its position. ¹³⁰

B- OTHER STATES IMITATE DELAWARE

Since these attempts to regulate corporations at the state level were useless, other states imitated Delaware. By the 1930's most states had passed many laws inspired in the Delaware General Corporation Law. Even after the New Deal era, alongside the expansion of federal regulatory legislation some states still imitated Delaware as example. It appears that after the World War II thirty states did so. ¹³¹

The reason was obvious. Some states wished to encourage domestic companies to remain in them while others wished to attract "foreign corporations," in order to increase revenues. The sound method to do so was to emulate Delaware by revising their acts along similar lines. Only two or three jurisdictions seem to have resisted that temptation. ¹³² In

¹³⁰ A. Link, Wilson: The New Freedom (1956) at 34.

¹³¹ R. Nader, Constitutionalizing the Corporation: The Case for the Federal Chartering of Giant Corporations (1976) at 60.

¹³² G. Seward, Basic Corporate Practice (1966) at 5.

spite of such efforts Delaware has preserved its character as the leading incorporating state.

Although at its birth in 1943 the Model Business Corporations Act represented an alternative corporation law varying major respects from Delaware's statute, over the years the Act has been modified to compete with Delaware on its own terms. Nowadays its underlying idea is similar to that of Delaware. Corporate laws are a collection of simple rules on internal matters for business associations, susceptible of contractual arrangements, leaving regulation of external activities either to the jurisdiction of the federal and state courts or to specific federal statutes enforced by administrative agencies. ¹³³

C. DELAWARE IN THE LAST DECADES

In 1963 the Delaware legislature commissioned a Revision Committee to conduct a comprehensive review of the State's General Corporation Law. After three years working the committee submitted a project that was promptly enacted and became effective on July 3, 1967.

The business community received the reform favorably ¹³⁴ Delaware confirmed its tradition as an innovative state in corporate matters. The revision achieved the three objectives originally pursued: to update and

¹³³ A. Gibson, "Surplus, so What?, The Model Act Modernized" (1962) 17 Bus. Law 476.

¹³⁴ Nader, *supra* note 131 at 65.

clarify the language of the existing corporation law, to simplify the mechanics for corporate action and to adjust it to the realities of modern corporate life; and to make changes in the substantive provisions of the statute where experience had shown that improvements could be made. The commission recognized the importance of keeping the body of precedents built up over more than sixty years, and for that reason it preserved as much of the traditional wording.¹³⁵

Under this revision some traditional restrictions on corporate activity disappeared from the Delaware corporations statute: ¹³⁶ a) a duplicate stock ledger need not to be kept in Delaware, ¹³⁷ and the stock ledger and other corporate records may be kept on magnetic tape, microfilm or any other information storage device; ¹³⁸ b) if the by laws so provide, the date, hour and place of a shareholder meeting may be set each year by directors' resolution, ¹³⁹ c) a "restated certificate of incorporation" may be filed by a corporation which reflects all the original provisions of and all the successive amendments to the certificate which are at present in effect, and it supersedes all the underlying documents; ¹⁴⁰ d) shareholders' meetings may be dispensed

DELAWARE AND THE THEORIES OF THE FIRM

1. SEPARATION OF OWNERSHIP FROM CONTROL

A. GOVERNANCE OF WIDELY HELD CORPORATIONS

For the critics of Delaware corporate law the fundamental issue is "what a corporation law ought to be" as opposed to "what a corporation law is." They offer their own idea of a "good" corporate governance and its relations with federal and state law, by contrast with what they regard as a "bad" system.¹⁴²

¹⁴² W. Cary, "Federalism and Corporate Law: Reflections upon Delaware" (1974) 83 Yale L.J. 663; Comment, "Law for Sale: A study of the Corporation Law of 1967" (1969) 117 U. Pa. L. Rev. 861; W. Conrad, "An Overview of the Laws of the Corporations" (1973) 71 Mich. L. Rev. 623; M. Eisenberg, "The Modernization of Corporate Law: An Essay for Bill Cary" (1983) 37 U. of Min. L. Rev. 187; E. Feltz, "State Statutes: Their Role in Prescribing Norms of Responsible Management Conduct" (1976) 31 Bus. Law 1931; R. Jennings, "Federalization of Corporation Law: Part Way or All the Way" (1976) 31 Bus. Law 991; D. Schwartz, "A case for Federal Chartering of Corporations" (1976) 31 Bus. Law 1125.

The basic premise is the Berle and Means' thesis that the separation of ownership from control in the widely held corporations eliminates the incentives of managers to act in interest of shareholders. Because shareholders are highly dispersed, they are unable to exercise effective control over corporate affairs. The real power lies in the hands of managers who usually hold only a small percentage of the corporation's shares. 143

Shareholders have the right to vote and to sue for breaches of fiduciary duties, but they have no access to the relevant information needed to make rational decision. Even if an individual shareholder wishes to take an active role in the corporation's affairs, he may lack the necessary information or the knowledge required to understand it.

Delaware's critics observe that while economic concentration is increasing rapidly in certain industries through mergers and acquisitions, the power of vote of ordinary shareholders becomes diluted because ownership is spread over a diffuse and apathetic group. The correct thing for an unhappy shareholder to do is to sell his stock and invest elsewhere. 144

Among the divorce of ownership and control are the institutional investors (insurance companies, banks, trust departments, savings and loan association, mutual funds, and pension funds) who have themselves

143 Berle & Means, *supra* note 79 at 112-113.

144 Comment, *supra* note 142 at 896.

managers. Since they are one of the most important shareholders of American corporations, when they do not use their power, they help management in insulating from control.

For Delaware's critics, the present corporate structure means that the power of corporations is sustained by the bureaucratic structure within the corporation and for that reason corporate decisions will be largely anonymous and unaccountable. Isolated managers are emboldened to make decisions that aggrandize the power of the corporation, at the expense of stockholders, creditors and even society.¹⁴⁵

The conclusion for this critics is clear: state regulation has failed and federal intervention is necessary to prevent managers from exploiting shareholders;¹⁴⁶ only the federal government through specialized agencies can protect adequately dispersed and institutional investors, creditors and society.

B. CORPORATION'S CONFLICT OF INTERESTS

Delaware's success would have its explanation in the preference of managers who realize that Delaware corporate law benefits them at the

¹⁴⁵ Schwartz, *supra* note 142 at 1129.

¹⁴⁶ "So through various statutory changes the stockholders' position, once a controlling factor in the running of the enterprise has declined from extreme strength to practical impotence. The legal changes probably have merely recognized the underlying economic fact." A. Berle & G. Means, *supra* note 79 at 141.

expense of shareholders.¹⁴⁷ Certain judicial decisions would illustrate that the Delaware courts have undertaken to carry out the "public policy" of the state (i.e., raising revenues for the state¹⁴⁸) creating a "favorable climate" for management (i.e., granting freedom to managers). In this sense Delaware corporate law is "bad."¹⁴⁹

¹⁴⁷ After the publication of the Cary article, most commentators have agreed that Delaware provided inadequate protection for shareholders. The American Law Institute proposed **Principles of Corporate Governance and Structure: Restatement and Recommendations** (Tent. Draft No. 1, 1982; Tent. Draft No. 2, 1984; Tent. Draft No. 4, 1985; Tent. Draft No. 5, 1985) centered on the establishment of higher standards of director liability of corporate decisions.

¹⁴⁸ Cary, *supra* note 142 at 684. The legislature itself has recognized that fact in its Preamble to the statute that created the commission to study and recommend revisions to Delaware's corporation law (v. 94, ch. 213 [1963] Del. Laws 724):

"WHEREAS, the State of Delaware has a long and beneficial history as the domicile of nationally known corporations; and
 WHEREAS, the favorable climate which the State of Delaware has traditionally provided for corporations has been a leading source of revenue for the State; and
 WHEREAS, many states have enacted new corporation laws in recent years in an effort to compete with Delaware for corporate business; and
 WHEREAS, there has been no comprehensive revision of the Delaware corporation law since its enactment in 1899; and
 WHEREAS, the General Assembly of the State of Delaware declared it to be the public policy of the State to maintain a favorable business climate and to encourage corporations to make Delaware their domicile."

The goal of the revision commission was "to ascertain what other states have to attract corporations that we do not have." (Comment, *supra* note 147 at 831). For similar reasons, the commission decided that the revision should not follow the ABA-ALI Model Business Corporation Act (1963 ver. 1). "We do not want to be a 'me too' state in view of the fact that in the past most of the other States had copied our laws and that we should be a leader not a follower" (Ibid. at 866-67).

¹⁴⁹ Cary, *supra* note 147 at 689.

A "good" corporate law has as "public policy" protecting various interests against any possible conflict. Hence Delaware's critics analyze the interests that corporate law ought to protect and propose the different legal devices that should be used.

1 CREDITORS' INTEREST

Although creditors have no direct share in the success of a corporation, they lend it money or goods only on the strength of the corporation's promise to repay. Hence, they wish to ensure payment, requiring the presence of substantial assets, preventing the encumbrance of those assets by obligations which would subordinate their claims to those of other creditors and limiting the paying out of those assets to shareholders.

Attainment of these objectives could be facilitated by various limitations in the laws governing corporations, precisely those that Delaware law (and most of the states) lacks: requirement that a corporation could not be chartered, or cannot begin business, until a certain amount of money or assets is paid in by shareholders, that shareholders who promise to pay a certain amount for their shares might be made personally liable for that amount, even if the enterprise never makes a start; that stock may only be issued for cash, or for property which has a definite value, and that the by-laws set out specific

circumstances under which the dividends may be paid to the shareholders.¹⁵⁰

It seems clear that in this point the critics long for the traditional corporate law of the nineteenth century, whose features would perfectly coincide with the restrictions they suggest.

2. SHAREHOLDERS' INTERESTS

For Delaware's entire separation between ownership and control, means that there are two categories of shareholders: management investors, who plan the organization of a corporation and retain control over its operation, with a position to profit at the expense of other investors and creditors, and outsider investors, who are not part of the management investors group, with a position similar to that of other creditors.

To avoid the inherent conflicts of interests corporate laws should regulate strictly the organization and behaviour of the corporate entity, protecting the interests of outside shareholders, and not furthering the interests of a privileged management. By contrast, Delaware corporate law would lack the protection of adequate provisions on cumulative vote, preemptive rights, class votes, appraisal rights

3. GENERAL INTERESTS

Society is concerned with corporate activities for the impact on issues like pollution, salaries, prices, safety, etc. Since some abuses are possible, corporate laws should be aimed directly at balancing the relations between corporations and other associations and persons, imposing prohibitions and restrictions to dangerous conducts.

Delaware corporate laws would not include provisions to accomplish such purposes, more seriously, it would lack essential restrictions to the scope of a corporation's activities: upper limits on capitalization, prohibition against holding property or doing business outside the chartering state; limitations or prohibitions for corporations to hold shares of other corporations, requirement that one or more directors be state residents.¹⁵¹ Once again the critique referred to the traditional restrictions of the nineteenth century corporate law.

II. THE CORPORATION AS "NEXUS OF CONTRACTS"

A. EFFICIENCY OF SEPARATION BETWEEN OWNERSHIP AND CONTROL

Delaware has also its defenders.¹⁵² They reject the premise of the

¹⁵¹ Kirk, *supra* note 71 at 742.

Rev. 650, Easterbrook, (continued)

dangerous effects of the separation of control from ownership.¹⁵³ It is true that ownership and control are separated in the large modern corporation. However, it seems rational that shareholders should not need or desire to exercise direct control over managers' decision making.¹⁵⁴

"Corporate efficiency calls for decisional and operational processes wholly inconsistent with periodic, much less constant, intrusion by shareholders. Such intrusion not only reduces efficiency but carries with it other costs, such as legal fees and increased personnel needs, which the shareholders themselves must ultimately bear."¹⁵⁵

Both closely held and widely held corporations have their own mechanism in charters or by laws to assure shareholders their proper role in the

¹⁵³ See *supra* note 79 at 35.

¹⁵⁴ Macey & Miller, *supra* note 152 at 476.

¹⁵⁵ Winter, *supra* note 152 at 276.

life of the firm. Before the incorporation the potential shareholders themselves decide what is appropriate to their needs since they can write the type of charter they want. After the incorporation potential investors can examine the charter and by-laws to assess the role they will have, and they can refrain from investing or after investing they can require certain measures. 156

Delaware's defenders accept that the interests of shareholders often diverge from the interests of the managers. As rational economic actors, managers will be concerned with maximizing their own utility rather than the shareholders' utility and shareholders will have incentives to limit the extent of their risks, looking at the charter and by-laws and exercising all their vested rights.

However, it is very unlikely that investors entrust their money to managers without certain incentives to act in their interest and therefore that they voluntarily invest in firms located in Delaware if its law exacerbated the detriment to shareholders caused by the separation of ownership and control. The evidence is that investors buy and sell stock of Delaware corporations successfully, therefore there is no reason to suppose that they dislike the Delaware corporate law because it lacks the protection they need. 157

156 Winter, *supra* note 152 at 277

157 Fischel, *The Race*, *supra* note 152 at 913.

Delaware's defenders have adopted the "Nexus of Contracts Theory": corporations are nexus of contracts not property of shareholders. Corporations like other business associations, are simply "legal fictions" which serve as nexus for a set of contractual relationships between investors and management, among investors, between the corporation and suppliers of goods, services, labour and loans. Shareholders would not be the only "owners" of the firm, but one of the contracting parties in the "nexus." More exactly the corporate enterprise is a venture in which stockholders furnish the capital and receive dividends and management furnish services and receive remuneration.¹⁴⁴

If the contract under which the stockholder is said to offer his investment (an exchange for managers' services) is "freely" and "freely" made by the parties then on contractarian assumptions, the performance makes each of the parties better off and creates a larger pie for society.¹⁴⁵

Contractarianism, detached from ownership of management, is an alternative to the traditional corporation, merely a case of reorganization of labour, with different allocation of risk bearing.

See E. A. Posner, *Economic Analysis of Law* (2d ed. 1977) at 294-295; see also Posner, "Behavioral Theory of the Firm: Managerial Behaviour, Agency Costs, and Corporate Policy," (1980) 37 J. Bus. Econ. 365; Smith, "A Contractarian Approach to the Theory of the Firm," 37 J. Bus. Econ. 117, and see also the discussion with some intriguing speculation attributed to Posner, *supra* note 144, at 295; Young, "The Contractual Nature of the Firm," (1984) 13 J. Law & Econ. 1; Posner & Jensen, "Separation of Ownership and Control," (1982) 25 J. L. & Econ. 40; Fischel, "Labour Markets and 'Labour' as Competed with Capital Markets and Corporate Law" (1984) 51 U. Chi. L. Rev. 1141; McHughen, "Corporate Governance", (1984) 93 Yale L.J. 1001-1044.

¹⁴⁴ Posner & Jensen, *supra* note 144 at 291-292.

The rational investor chooses to hold a diversified portfolio containing securities of many firms and has neither the interest or the expertise to manage the affairs of a firm. Rather, he or she prefers to remain passive. 180

Delaware's defenders observe that not even institutional shareholders have attempted to influence management behaviour. They have a very diversified portfolio and if they were to exert direct control over the firms in which they owned stock, they would have to hire more personnel to keep informed about the activities of each firm. The costs of such personnel probably would force such investors to reduce their diversification. 181

"The [management] group consists of people who are experienced in the business and involved in it on a full time, day to day basis. In contrast, the typical shareholder is not knowledgeable about the business of the firm, does not derive an important part of his livelihood from it, and neither expects nor has an incentive to participate in the management of the firm. It is no more anomalous that shareholders do not manage or control their corporation than that bondholders do not manage or control the corporation whose bonds they hold, or trust beneficiaries the trustee. All three groups have an investment interest." 182

180 Fischel, *The Pass*, *supra* note 152 at 419-20. Winter, *supra* note 152 at 453.

181 Winter, *supra* note 152 at 264.

182 Posner, *supra* note 158 at 301. The distinction between trustees and management have been noted by Professor Winter. Trustees are not charged with the task of hiring the most efficient mix of productive inputs or with monitoring the use of these inputs, so as to avoid shirking; they do not profit maximize in the context of the competitive market for products or services; they are not concerned with the innovation in products or methods of production or distribution, the

B. "THE MARKET" AND "THE COSTS OF AGENCY"

Behavioral economists recognize that some costs arise from the separation of ownership and management. The "nexus of contracts" implies an agency in which shareholders are "principals" and managers are "agents." In any agency relationship the interest of the agent can diverge from that of the principal.¹⁶³

Many legal, policy, and contractual arrangements are attempts to minimize the agency costs and risks that cannot be avoided. Independent committees in response to derivative suits,¹⁶⁴ public offerings of common stock when a corporation is paying dividends,¹⁶⁵ and independent auditors and outside director representation to protect the costs of the inherent conflicts of interest between corporate managers and shareholders are all "Agency Costs." Like stock option plans and other compensation

1. *Agency Costs*

Corporate managers, like any one of us, are not engaged in a competition effort which requires monitoring and the assignment of responsibility. They do not fear that beneficiaries may sell their interest to competitors who will install new trustees (Winter, *supra* note 152 at 653).

But agency costs are said to be inevitable consequence of the fact that some firm's operations within the firm the performance of people (both top and bottom who are best or better) able to perform them, but who have interests that conflict with those that the delegator contracts with them to advance and protect. (Fama & Jensen, *supra* note 152 at 83).

¹⁶³ Fama & Jensen, *supra* note 152 at 775.

¹⁶⁴ See Porterbrook, *The Agency Cost*, *supra* note 152 at 654.

¹⁶⁵ See Walter & Zimmerman, *supra* note 152 at 613.

packages force managers to share the risk with shareholders, while providing managers with an incentive to act in shareholder's interest.

However, Delaware's defenders insist that the market forces provide protection for shareholders that legal rules or contractual bargains cannot provide. The stock market anticipates the costs of agency. The price which investors pay for stock reflects the risk of divergence of interests. It follows that costs have to be outweighed by gains if the price of the stock is to be maintained above a level.¹⁶⁷

From the market's point of view, the agency problem is as much a problem for managers as it is for shareholders. The corporation is necessary as a necessary condition for management's success. Only shareholders' involvement can entail managers' involvement. Only the corporation's success creates opportunities for management to profit.¹⁶⁸

Delaware's defenders remark that managers, like other people, have strong incentives to maximize the value of their services, since the monopolized labour market would use performance of the company to evaluate a manager's ability, with relation to that of other managers. It is harder for a manager to find alternative employment than for

¹⁶⁷ Fischel, *The Race*, *supra* note 152 at 918.

¹⁶⁸ Winter, *supra* note 152 at 264.

shareholders to find alternative outlets for their shares. The stock market makes alienation easier. 169

Based on this premise Professor Manne, in a series of articles, 170 has argued that share price and the capital market exert discipline on the behaviour of corporate management. The lower the share price, the easier it will be for others to take over the corporation, profiting by the compensation received as successful managers and by capital gains generated by the increase in share price through greater earnings. 171

Management tries to induce investors to charge their firm's stock instead of stock in companies incorporated in other states or other countries and other alternative forms of investment in the capital market. Thus management's tenure in office depends on the price of stock because the corporation's ability to compete effectively in the stock market depends on its ability to raise capital.

In other words, to be aware of the market for managers is a mechanism that should reassure corporate stockholders that whatever may be

169 These arguments are supported by Professor Kraakman's observation that a firm's officers and directors are less efficient risk bearers than a firm's shareholders because they are unable to diversify their human capital investment in the firm (Kraakman, *Corporate Liability* *supra* note 152 at 804).

170 H. Manne, "Cash Tender Offers for Shares: A Reply to Chairman Cohen" (1967) 1 Duke L.J. 231, "Our Two Corporation Systems: Law and Economics" (1967) 5 Va. L. Rev. 259, "Mergers and the Market for Corporate Control" (1968) 23 J. Pol. Econ. 110, "Some Theoretical Aspects of Share Voting" (1964) 64 Cal. L. Rev. 1427.

171 Winter, *supra* note 152 at 266.

the discretion that "agency" vests in management, their corporation will employ managers of the best quality at the lowest cost. Neither managers nor shareholders have interest to see the ability of a corporation to raise capital impaired. Excessive management discretion affects investors and lenders' judgment about the long run earning potential of the firm because raising capital through equity and debt are closely related to managers' behaviour.¹⁷²

In summary, if Delaware permits corporate management to exploit shareholders and other states do not, earnings of Delaware corporation would be less than earnings of comparable corporation chartered in other states, as a consequence Delaware corporations would be at a disadvantage in raising debt or equity in the capital market and would be at a disadvantage in the stock market as well, thereby creating a threat of takeover which might replace management.

C. THE INTERACTION OF THE MARKET, MANAGER, ELECTION AND "HAPPYGRACE" WASTE

As argued before, it is not true that the corporate agency problem is solved, on one hand, by either takeover or merger and, on the other hand, by corporate management discretion in a manner which is efficient. There is also a counterforce about takeover and merger, i.e., and on the other hand, by takeover or merger, managers' opportunities in the stock market. The

¹⁷² Weber *supra* note 152 at 275.

¹⁷³ B. Payzinger & H. Butler, The Role *supra* note 152 at 179.

The balance between managers' discretion and shareholders' control is the crucial point of the interactions between the stock market and legal rules.

[The] relevant discretion is also directly related to management's efficiency in profit maximizing on behalf of the firm. The stock management which generates the highest stock price will also have the most discretion in the use of corporate assets. Put shareholders in that firm also benefit from the high stock price. Management discretion and shareholder benefit, therefore, move in the same direction.¹⁹⁴

Professor Friedman and Long do support that the wholesale elimination of management discretion, rather than the reduction and correction of unrestricted shareholder vulnerability, would be detrimental to the economy because economic agents would not allocate rewards to resources (capital, labor, management) according to their particular productivity.

As the other hypothesis, this is based on principles of economic efficiency and rationality. Extreme strategies of protection will lead to reduction in share price as investors will become concerned with the adverse effects of such strategies, and go to the stock market in search of other profitable alternative investments.¹⁹⁵

¹⁹⁴ Winter, *supra* note 153 at 221.

¹⁹⁵ For example, the manager who is not allowed to make errors will not be inclined to take risks", Baystinger & Butler, *supra* note 149 at 451. See also Easterbrook, Manager's Discretion, *supra* note 152 at 34; Easterbrook & Fischel, Auctions and Sunk Costs, *supra* note 152 at 3; Easterbrook & Fischel, The Proper Role, *supra* note 152 at 1169.

Professors Baysinger and Butler tested the hypothesis in a model¹⁷⁶ which relates shareholder protection with managerial discretionality (the more protection, the less discretion) and also shareholder protection with shareholder opportunism (the more protection, the more opportunism).¹⁷⁷

The model led to the conclusion that the optimal governance structure for widely-held corporations has to avoid extremes: one which grants too much discretion to managers is not preferred by them because it can induce shareholders to sell their stock; while one which grants too little discretion is not preferred by shareholders because it also can induce a part of them to sell their stock in detriment of the other part and in benefit of "outside" investors. Therefore a balance is required to reduce the risks of excessive managers' discretion and excessive shareholders' opportunism.

Admitted that there is a case for legal restrictions on corporate management, behaviour is dependent on what these have to be carefully delineated to reduce identified vulnerability of shareholders without creating disincentives to managerial discretion. One of the favorite devices is that of "independent" directors who can protect the corporation against management, check up unfair practices (self-dealing,

¹⁷⁶ Baysinger & Butler, *supra* note 152 at 451.

¹⁷⁷ See also Maloney, McCormick & Tollison, "Economic Regulation, Competitive Governments, and Specialized Resources" (1984) 22 J. L. & Econ. 329 at 331.

excessive indemnification or compensation), insisting on proper auditing procedures; and reviewing corporate decisions of a magnitude sufficient to control risks. 170

III. THE FREEDOM OF CONTRACTS ON TRIAL

A. SHAREHOLDER AS CONTRACTING PARTIES

The economic analysis of Delaware's defenses is sound. Under its own premises it seems undebatable. Nevertheless many objections have arisen, based mostly on the notion of "contract." Delaware's critics doubt that such a notion can be used to describe either the process of bargaining or the arrangements between investors of publicly held corporations.

Others contend that shareholders cannot, and do not, "negotiate" with owners or managers of the corporation. "Stockholders vote for directors and have the right to instruct or to act for them. In that process, it is plain that

170 A. A. Alchian & H. Demsetz, "Production, Information Costs and Economic Organization," 62 *Am. Econ. Rev.* A similar conflict could appear between minority and majority shareholders. There are cases in which a shareholder or group of shareholders seem to lose rights within the corporation (e.g., elimination of dividends). As Professor Winter points out, the problem is the trade off between the benefits of eliminating all defeated minority expectations and the cost of injuring shareholders. "Legal rules which seek to minimize such problems by trying on one side or another rebuttable or conclusive presumptions may, on the other hand, invite the unreasonable behaviour they seek to control." Winter, *supra* note 157, at 380-381. Independent committees are frequent in Delaware corporate code, see 8 Del. C.

stockholders have less knowledge and fewer possibilities of election, than the "nexus of contracts" theory assumes.¹⁷⁰

Delaware's critics observe that most of the times the board is effectively nominated and elected by incumbent management, and the proxy system leaves stockholders with the passive role of voting for or against nominees who are pre-selected.¹⁸⁰ They know virtually nothing about the nominees since the information expressly required by SEC rules, apart from items concerning remuneration or compensation and possible conflict of interests, is a description of prior posts with the corporation and other business experience or occupation during the previous five years.¹⁸¹

On the same track, management's duties and rights are rarely defined by agreement, and more rarely exhibited to or negotiated with stockholder participation. At best, the proxy statement informs stockholders of the array of awards management may receive by way of different forms of compensation or other benefits.¹⁸² Even when the legally imposed terms are embedded in the contractual arrangements between investor and manager, stockholders' ability to learn about or affect the terms of the

¹⁷⁰ See 5 Del. C. 142 (1980).

Rev. 233; Note, "The Propriety of Judicial Deference to Corporate Boards of Directors" (1983) 96 Harv. L. Rev. 1634.

¹⁸¹ Securities Exchange Act Proxy Rules, Schedule 14A, Item 6.

¹⁸² Brudney, *supra* 180 at 1413.

relationship are limited.¹⁸³ Such terms are ambiguous and permit a wide range of discrepancies as to the diligence and intelligence of managers.¹⁸⁴

Besides, the critical remark, at any time the content of legally imposed restrictions on managerial discretion varies among jurisdictions because of the competition among the states. Moreover, in any particular jurisdiction changes occur in the law over time.¹⁸⁵

Experience and observation suggest that investors operate in great (though not unbreakable) assumptions about how insiders will behave, and that few, if any, investors (including sophisticated ones) are capable of anticipating decisions like *Lieven v. Sinclair*, *Cheff v. Mattes* or *Barret v. Denver Tramways*.

¹⁸³ *Brudney*, *supra* 130 at 1414.

¹⁸⁴ In particular, Professor Brudney notes that the case law has moved in the direction of giving directors and management unreviewable discretion in serving themselves at the expense of stockholders by expanding the "opportunity" of the business indemnity rule to measure performance of the duty of loyalty by the standards applied to the duty of care for negligence. See Brudney, *supra* 130 at 1414.

¹⁸⁵ Even so, Brudney reports the assumption that, in deciding particular cases, courts ought to limit managerial discretion by confining it to those acts to behavior that the parties rationally would have agreed on, acts because, in determining the very contingent considerations preclude objectively "rational" answer, and implicit value judgments infect apparently rational "answers." Thus, "rational" answers will vary with differences in the circumstances under which the parties are assumed to bargain, and with the extent of individual autonomy envisioned as appropriate for a society. Therefore, attempting to determine what the parties would have done leaves the arbitrator considerable freedom of decision, often allowing quite contradictory results. See Brudney, *supra* 130 at 1415-16. See also Farnsworth, "Imposition of Obligations in Contract," 1860, 65 Columbia L. Rev. 860 at 861 n. 1, footnote. The decision and jurisprudence of *Convertible Bonds*, 1943 Wisc. L. Rev. 167 at 168, 708; Parton, "Breach of Contract and the Common Law Duty to Perform in Good Faith" (1980) 94 Harv L. Rev. 369, at 371.

Directors are likely to identify more closely with officers and employees than with stockholders.¹⁸⁸

B. LIMITS IN THE MARKET'S OPERATION

1. LIMITS IN THE MANAGERIAL MARKET

The critics state that the market for managers is exceptionally imperfect, especially because of due to top managers' limited mobility, difficulties in pricing managerial services, or assessing the managerial quality. There is no evidence that can explain either magnitude of managerial discretion, or the uncertainty of the connection between managerial discretion and managerial inputs.¹⁸⁹

But then the empirical inquiries that suggest a relationship between corporate performance and management's compensation, and between corporate performance and management's displacement,¹⁹¹ do not demonstrate that the managers' labour market either adequately describes the relationship of stockholders and management or adequately aligns their interests with the corporation's prosperity. The question whether

¹⁸⁸ Fradette, *supra* 180 at 1421.

¹⁹¹ Note, "Management Compensation and the Managerial Labour Market", 1985 J. L. & Econ. 3, Conghian & Schmidt, "Executive Compensation, Management Turnover, and Firm Performance: An Empirical Investigation" (1985) 2 J. L. & Econ. 43; Murphy, "Corporate Performance and Managerial Remuneration: An empirical Analysis" (1985) 7 J. L. & Econ. 11.

management receives more compensation and less responsibilities than what is necessary to induce optimal efficiency is still a field to be explored.

2. LIMITS IN THE STOCK MARKET

Delaware critics maintain that the stock market is not a guarantee for shareholders, since it does not encourage competition by managers in disclosing the extent of their discretion concerning inputs or rewards. Thus its operation does not remedy the disproportion between information available on managerial discretion and managerial quality.¹⁸²

Rather, the general risks that affect all market assets affect the price of a particular stock and therefore this price does not reflect only firm-specific risk. Hence any decision to buy or sell stock incorporates aspects that are indifferent to managerial performance. However, it is doubted that the market can incorporate in stock prices any adequate estimate and discount of the risks of changes in the rules limiting managerial discretion. Therefore the price cannot properly reflect stockholder preferences concerning the appropriate scope of managerial discretion.¹⁸³

In other words, for Delaware's critics, the choice to buy or sell does not permit separation of treatment of the quality of management. From

¹⁸² Brudney, *supra* 130 at 1424.

¹⁸³ Brudney, *supra* 130 at 1425-26.

other aspects (e.g., firm's present or expected success). Investors do not have the ability to separate and assess management apart from the other components of the enterprise. 194

It is true that the stock market eases the takeover movement, that induces managements to be "efficient," i.e., maximizing shareholder wealth. However there is evidence of a direct relation between the size of the takeover and management buy out premiums paid in the last years. 195

Although stock price analysis suggest negative performance by takeover targets before the takeover, but that does not necessarily means that takeover reflect the displacement of incompetent, or the replacement by more competent management. The post acquisition results have raised serious doubts. 196

Takeovers might reflect more the inclination for self-aggrandizing aspirations of bidder managers to diversify their own risks at target's expense, than effort to displace "inefficient" target.

194 For a critique of this theory see Gordon & Kornhauser "Efficient Markets, Costly Information, and Securities Research" (1986) 60 NY U. L. Rev. 111; P. Copeland & J. Weston, **Financial Theory and Corporate Policy** (2d ed. 1983) at 319-47; Ackley, "Commodities and Capital: Prices and Quantities" (1983) 73 Am. Econ. Rev. 1 at 4.

195 Jensen & Ruback, "The Market for Corporate Control: The Scientific Evidence" (1983) 11 J. Fin. Econ. 5 at 23-26.

196 Ibid. at 16-22. See also Gilson, "A Structural Approach to Corporations: The Case Against Defensive Tactics in Tender Offers" (1981) 33 Stan. L. Rev. 819 at 873-74; Levine & Aaronovitch, "The Financial Characteristics of Firms and the Theory of Merger Activity" (1981) 30 J. Indus. Econ. 149 at 157; Trough, "Characteristics of Target Companies" (1977) 32 Bus. Law 1301 at 1302.

management. Also, sale by the target's shareholders in response to bids is not necessarily a vote of confidence in the bidder's management. 107

"To argue that the investor trades off the prerogatives of a sole owner in exchange for liquidity and the ability to diversify, neither reduces the breadth of management discretion nor increases investor awareness of the problem. The questions of adequacy of knowledge and volition remain. Does the investor know what he is giving up and what he is getting? And should he (institutionally) be given a better opportunity (choice) to negotiate or receive a tighter bargain than the market offers him?" 108

C. RISKS OF AGENCY

The main critique to the "market of contracts" theory is that the traditional agency relationship does not delineate the relationship between investors and management of large public corporation. The investor principal has neither control nor direction to his manager-agent. 109 Stockholders do not direct management activities. They do not have power or ability to interfere in management activities (ex ante or ex post), in particular because there is no direct face-to-face

107 See Easterbrook & Fischel, "The Proper Role," *supra* note 152 at 1185. See also Amihud & Lev, "Risk Reduction As a Managerial Motive for Conglomerate Mergers" (1981) 12 *Pratt J. Econ. 109 Brudney, *supra* 180 at 1430.

or personal communication or involvement by "the principal" in the operation of the enterprise. 200

DeLawre's critics observe that there are always severe limitations to the power of dispersed stockholders to control management's decisions, through "independent" directors or auditors. There are structural and institutional impediments for the execution of any kind of monitoring. Management's knowledge and experience in the corporate business are always superior to those who play a part time role and receive a part time compensation.

The resources available to management (for instance in terms of staff) are also superior to those available to "outsiders". 201 More seriously, if the "outside" directors were on equal footing with management, they would be "in job" directors. Each event would not provide an independent check on management discretion, so much as duplicate and relocate the very same discretion. 202

D. FRACTION OF THE FUTURE OF A VALUABLE DECISION

For DeLawre's critics, it is more to appreciate the magnitude of the difference between corporate principal-agent relationships and the investor-management relationship, it is to contrast between the

200. *Id.*

201. *Isidore, supra* note 143 at 143; *Winter, supra* note 142 at 285-286.

202. *Winter, supra* note 142 at 286.

fiduciary duties imposed by the law of agency and the fiduciary duties suitable for corporations. 203

1. Duty of Loyalty

The law of agency prescribes a categorical prohibition of transactions which, even if profitable to the principal, could result in a diversion of some benefit to the agent that would be difficult or impossible to detect or to measure; the only exception the law contemplates is informed consent by the principal to particular dealings.²⁰⁴

By contrast, state corporate law has relaxed the prohibition and its exception to permit direct and indirect self-dealing, and other diverse sorts of transactions.²⁰⁵ Instead of prohibition, corporate law imposes on the "theory of contract," allows a majority of stockholder or "independent" directors to give consent to otherwise prohibited transactions, subject only to the constraint of "fairness."²⁰⁶

2. Duty of Care

²⁰³ Baubrey, *supra* note 152 at 142.

²⁰⁴ Baubrey, *supra* note 141 at 143. See also March, "Are Directors Trustees? Conflict of Interest and Corporate Morality" (1966) 72 *Bul. Law* 35; Phillips, "Managerial Measure of Property: The Synthesizing Thread in Corporate Doctrine" (1979) 92 *Harvard L. Rev.* 134 at 138-90.

²⁰⁵ On the "independence" of directors, see M. Eisenberg, "Legal Models of Management Structure in the Modern Corporation: Officers, Directors and Accountants" (1975) 63 *Calif. L. Rev.* 375 at 380-84.

The courts note that the corporate law offers no more than admonitions to corporate agents to exercise care or to be diligent and prudent. There are no formal prohibitions or mandates that encourage the fulfillment of such duty. Management's and directors' fiduciary duty is addressed to reasonable discretion and not to maximal efforts. Even the minimum technique that required seems to be less demanding, because of standards provisions that require the degree of prudence to be exercised by directors to be only that expected by persons in a like position rather than that exercised in their own personal affairs.¹⁹⁰⁶

The standard coverage of conduct of required behavior is coupled by business law functions to which fiduciary follows only from "error" policies and more negligence than the "business judgment rule," which protects a board of directors, creates a "presumption" of informed and informed decision making. The honest belief that there is the best interests of the company.¹⁹⁰⁷

In any event the law's admonitions are necessarily vague in directing management's and directors' efforts in any task that requires honest belief, i.e., not self-serving discretion in the effort to achieve the goal of maximizing stockholder wealth, whether in employment, strategic policies or in normal

¹⁹⁰⁶ *id.*, *supra* note at 1140. See also O'Neil, "Demise of the Director's Duty of Care: Indefinite Avoidance of Standards and Sanctions Through the Business Judgment Rule" (1984) 62 Tex. L. Rev. 591 at 626.

¹⁹⁰⁷ See Vasey & Manning, "Modified Standard: Safe Harbour or Discharged Rule" (1981) 35 Bus. Law 919, 926-30; Bishop, "Sitting Back and Picking Ducks: New Trends in Indemnification of Corporate Directors and Officers" (1968) 77 Yale L. J. 1078 at 1099.

continuing operations. And the more such discretion the task requires, the less meaningful or compelling is the law mandate." 200

For the critics it is obvious that for larger organizations, with specialized human and material assets and more complex information flows, the scope of managerial discretion is large and admonitions to exercise diligence or prudence are useless. Such a discretion can impose on society and impose a cost that cannot be reduced by contractual sanctions. One of the parties (stockholders) is unable to function effectively in the buy-sell and monitoring process without some federal intervention. 201

CORPORATE POWER, CURRENT AND FUTURE

One critic has observed that most of the American business is conducted through a complex hierarchy of company systems. "The business interests of these corporate systems are not held by the parent corporation but by hundreds of subsidiary corporations incorporated in so many different states that the ownership is often twice or more removed from the asset themselves. In state corporate law, and Delaware amongst them, fail to deal with that problem.

200 Brudney, *supra* 180 at 1442.

201 Brudney, *supra* 180 at 1443. But see *Smith v. Van Gorkom*, *infra* note 403 and accompanying text.

202 H. Eisenberg, "Metacorporatism: The Effect of Corporate Structure on Corporate Control" (1971) 84 Harv. L. Rev. 1577.

When the business assets are removed from effective control by the shareholders of the parent company,²¹¹ the directors of that company are able to acquire or dispose of such assets or redeploy them among units without the necessity of obtaining permission from the shareholders, either of the parent company or of the subsidiaries. The directors of the parent company play the role of the shareholders of the subsidiary since, through exercising the voting power vested in the parent,²¹²

the directors of the parent company are able to exercise the voting power vested in the parent company, and the directors of the subsidiary are able to exercise the voting power vested in the subsidiary.

The directors of the parent company are able to exercise the voting power vested in the parent company, and the directors of the subsidiary are able to exercise the voting power vested in the subsidiary. The directors of the parent company are able to exercise the voting power vested in the parent company, and the directors of the subsidiary are able to exercise the voting power vested in the subsidiary.

The directors of the parent company are able to exercise the voting power vested in the parent company, and the directors of the subsidiary are able to exercise the voting power vested in the subsidiary. The directors of the parent company are able to exercise the voting power vested in the parent company, and the directors of the subsidiary are able to exercise the voting power vested in the subsidiary.

²¹⁴ See, e.g., *supra* note 134 at 185.

IV. CONCLUSION

The criteria maintain that Delaware corporate law enables managers to proceed with executive discretion and only for the entity's benefit but for that of the managers, and fetters the corporation with a minimum of responsibilities to its creditors, its shareholders, and the public.

The only criterion the minimum level of Delaware would be that its development and hence the development of corporate law in other jurisdictions. Delaware corporate law is not of the same law of corporate law. Why pay a price for a corporation for the protection of shareholders, creditors, and the public more so than Delaware? Corporate law is not a monopoly but they can be nullified by the law to develop a corporation or responsibility in another state.²¹²

By contrast, corporate law is not a monopoly but it is not in the interest of managers to seek a monopoly for it is a monopoly which leads to better management and protection, and not to the competition between

212. *Id.* *supra*, note 147, at 100. The Delaware corporation law is not a monopoly, and states, a monopoly, and a monopoly of the state. Corporate law are of a monopoly and a monopoly. The Delaware state provides that no corporation may be created or operate without first having obtained a certificate of incorporation from the Secretary of State (Cal. Corp. C 2106, 111 Pa. Corp. Act 1306, N.Y. Corp. Act 1411) and that they pay a fee for an officer's certificate annually with the Secretary of State (Cal. Corp. C 2106, 111 Pa. Corp. Act 1411) and other statements. (Cal. Corp. C 2107, 111 Pa. Corp. Act 1420). Pseudo foreign corporations are required to comply with certain sections of state law for the protection of creditors and shareholders, to the exclusion of the law of the jurisdiction in which it is incorporated (Cal. Corp. C 2115, N.Y. Corp. Act 1317).

states for efficiency in a competition on which legal systems provide an optimal balance between both. If Delaware is the leading state in that competition, it is because Delaware's legal rules are the most appropriate to attract participants in the market. 210

There is, however, a danger of taking this position because it provides the wrong theoretical model. The model supposes that maximizing shareholder and management self-interest will produce market efficiency in Delaware through a process of competition. Adam Smith's invisible hand, in which the self-interest of the individual leads to the welfare of society, and the market leads to the efficiency of the economy, is a useful metaphor for the workings of industry and commerce.

210 Winter, *supra* note 162 at 73. For an analysis of the pattern of Delaware ownership that confirms this conclusion see *infra* note 556 and accompanying text.

211 Meely & Miller, *supra* note 162 at 477. The liberality of state law is "the evidence, not of management overreaching, but of the fact that state law has moved in a direction consistent with an economic model of the management function." Winter, *supra* note 162 at 200.

IV

DELAWARE AND SHAREHOLDERS

INTRODUCTION

Nowadays the corporate code, the set of flexible guidelines or procedures for the operation in Delaware, is the wide scope allowed for corporate activities. Most of such provisions are now part of the corporate codes. Furthermore, the controversy about the Delaware corporate law is now concentrated to the balance between shareholder rights and directors' duties. For this reason, the next two sections deal with each rights and duties, rights and duties that delineate the range of shareholder's protection and managers' discretion.

Delaware Corporation Code is a contract. It authorizes and supports private arrangements that permit firms to contract around the statutory scheme by drafting or amending their corporate by laws or charters. It follows the principle that a detailed and mandatory

corporate statute may not be suitable for all sort of corporations. Hence most rules of the Delaware Corporation Code only apply in default of any rule to the contrary in the corporate charter or by-laws. 218

The flexibility is represented by a rule of interpretation under which an action that would be prohibited under one section of the Code is nevertheless permitted if it is authorized under some other section of the Code. 219 This rule eliminates the necessity for those forming a corporation to consult and anticipate all future contingencies when forming the corporation. As one of the commenters of the 1967 Revision has noted, "it is not a wise policy to require them [the incorporators] to stop the clock and consider every possible contingency with unforeseeable consequences." 220

CONCLUSION

Corporations are not "internal affairs" of the state. They are legal entities with officers, directors, and shareholders. The law should extend the relationship between such

²¹⁸ See, e.g., *Managers*, *supra* note 162 at 549.

²¹⁹ See, e.g., *Del. Ch.* 361, 365067, 195 A. 2d 375, 377-78 (1963).

²²⁰ See, e.g., *The Limits of Expanded Choice: An Analysis of the Relationship Between Express and Implied Contract Terms* (1985) 73 *Calif. L. Rev.* 2d at 106.

²²¹ Comment, *supra* note 142 at 834.

²²² RESTATEMENT (SECOND) OF CONFLICT OF LAWS §. 301-313.

groups and third parties, particularly creditors. 223 A few cases excepted 224 the federal powers have not made regulations governing the internal affairs of corporations, no matter how extensive their connections with interstate commerce. 225

As commented in section 11, the question of jurisdiction over corporations, both interstate commerce and not with their expansion in number and influence, has been a problem of the twentieth century. The principle that a person is subject to **in personam** jurisdiction in the state where it is domiciled was the rule of the common law and has been not only in the United States but also in other countries at the same time. The subject of jurisdiction over corporations in **personam** jurisdiction with the corporation is a matter of course, but it has been a problem under one state or another, and it has been a problem in other states, especially if jurisdiction over the corporation is not based on personal jurisdiction. These states have been discussed. 226

The principle of jurisdiction over corporations in **personam** jurisdiction over corporations, that each state has the power to render judgment,

223 *See* **supra** note 147 at 147.

224 *See* *International Shoe Co. v. Washington*, 326 U.S. 310 (1945), 117 F.2d 101, 51-1 USTC ¶10,000.

225 *See* **supra** note 147 at 147.

226 *International Shoe Co. v. Washington*, 326 U.S. 310 (1945).

227 These statutes give states jurisdiction over foreign corporations "to the extent permissible under the Constitution." *Macey & Miller*, **supra** note 152 at 495.

affecting its internal affairs. For the conflict-of-laws questions that arise, the courts accepted the need for certainty and coherence in the choice of law. Then they have constantly applied the law of the country of the corporation involving internal affairs of foreign corporations. All countries were excepted. 224

However, some courts applied the law governing the corporation's internal affairs in the federal courts. Thus a case of a corporation's internal affairs can be brought in or removed to federal court under diversity of citizenship jurisdiction, provided that

THE CHOICE-OF-LAW QUESTION OF CORPORATE LAW, 1950-1960 (1960)

Rationale. Application of the local law of the state of incorporation with a policy supported by the choice-of-law rule to promote the needs of the interstate and international system, i.e., predictability and uniformity of result, satisfaction of the justified expectations of the parties and efficient application of the law to be applied.

Corporate treatment of directors, officers and shareholders is a corporate attribute which can only be attained by having local and exclusive jurisdiction of those persons with respect to the corporation governed by a single law. To the extent that they function in the nation, these persons would usually expect that their rights and duties with respect to the corporation would be determined by the local law of the state of incorporation. This state is easily identifiable, and the application of local law is attained when the local law of the state is applied.

224. For instance, courts involving the internal affairs of 'pseudo-corporations' are cited. RESTATEMENT (SECOND) OF CONFLICT OF LAWS s. 302.

the citizenship requirements of 28 U.S.C. 1332 (a) ²³⁰ are met or under pendent jurisdiction as part of a case involving a federal issue. ²³¹

Therefore in federal suits involving the internal affairs of Delaware corporations the Delaware laws ordinarily apply. There is an interplay between the **Erie** doctrine ²³² (according to which the substantive law to be applied by the federal courts in any case is state law, except when the matter is properly a federal matter) and the conflict-of-laws principle ²³³ that the law of the chartering state governs the corporation's internal affairs. ²³⁴

²³⁰ 28 U.S.C. § 1332 (1970). This provision is applicable to derivative suits brought on behalf of a national corporation against management or controlling shareholders for breach of fiduciary duties, if the corporation has a financial interest of more than \$10,000 in the litigation. The difficulties to establish the diversity jurisdiction and to find a federal forum are discussed in Young, *supra* note 142 at 154.

²³¹ This doctrine enables a federal court to exercise jurisdiction over nonfederal claims for which there is no independent jurisdictional basis when these claims are related to federal claims properly before the court (Macey & Miller, *supra* note 152 at 495). See **Forest Labs., Inc. v. Pillsbury Co.**, 452 F.2d 621, 629 (7th Cir. 1971) (finding that claims under Delaware law against a Delaware corporation could be brought in the federal court even without diversity if the claims are sufficiently related to federal claims also brought against the corporation).

²³² **Erie R.R. v. Tompkins**, 304 U.S. 64 (1933).

²³³ In **Klaxon v. Stentor Elec. Mfg. Co.**, 313 U.S. 487, 496 (1941) and in **Day & Zimmerman, Inc. v. Challoner**, 423 U.S. 3 (1975), the Supreme Court decided that the **Erie** doctrine requires a federal court to apply the conflict-of-laws rules of the state in which the federal court sits.

²³⁴ **First Nat'l City Bank v. Banco para el Comercio Exterior de Cuba**, 462 U.S. 611, 621 (1983).

It appears that a substantial proportion of actions are brought in Delaware. Partly because under the doctrine of **forum non conveniens** other state's courts may dismiss actions involving the internal affairs of a Delaware corporation on the ground that the litigation should properly be brought in the state where the firm is incorporated.²³⁵

In litigation involving corporate directors, jurisdiction is obtained in Delaware under 10 Del. C. § 114 (a) providing that all persons who serve as directors or trustees of a Delaware corporation are deemed to have consented to the appointment of the corporation's registered agents or the Delaware Secretary of State as their agent upon whom service of process may be made in all civil actions brought in the state involving the corporation.

In contrast to other states,²³⁶ Delaware has no statutory provision requiring plaintiffs to post security for expenses in shareholder derivative suits.²³⁷ Probably for this reason derivative suits have had

²³⁵ *Rogers v. Guaranty Trust Co.*, 355 U.S. 540, 18 AFTR2d 61-1011 (1958).

²³⁶ See *Macey & Miller, supra* note 152 at 311 (Cal. Corp. C. § 380 (plaintiff may be required to furnish security for costs and attorney's fees, of such nature and amount not exceeding \$50,000; 111 Ill. Bus. Corp. Act 110-5-101 (nonresident plaintiff or applicant must furnish cost bond or action may be dismissed); N.Y. Bus. Corp. Act 62b (corporation is entitled to request bond to cover reasonable expenses which may be incurred by it if action is instituted by holders of less than 5% of outstanding shares of any class, unless such shares have a market value in excess of \$50,000); Tex. Bus. Corp. Act 5.14 (shareholders bringing suit in right of corporation may be required at discretion of court to give security for expenses)).

²³⁷ There is a general opinion that at least some fraction of derivative suits are "strike" suits. The statutory provision requiring
(continued)

an important development in Delaware courts. Besides, Delaware courts award attorneys' fees based on the relief obtained rather than the number of hours expended, ²³⁸ attitude that might encourage counsel to suggest litigation in Delaware.

III. SHAREHOLDER RIGHTS

A. PREEMPTIVE RIGHTS

Prior to 1967, the only reference to preemptive rights in the Delaware Corporation Code was an authorization for charter provision limiting or denying such rights. In absence of such charter provision, common law preemptive rights existed. ²³⁹

²³⁸ See, e.g., *supra* note 152 at 152 (plaintiffs' request for expense as a device suited to curtail the incidence of such "strike" suits). See Macey & Miller, *supra* note 152 at 510-11.

²³⁹ *Dann v. Chrysler Corp.*, 42 Del. Ch. 508, 215 A. 2d 709 (1965), aff'd, 43 Del. Ch. 252, 223 A. 2d 664 (1967) (plaintiff's counsel in shareholder derivative suits were awarded fees on a common fund or quantum meruit theory); *Thomas v. Kempner*, 198 A. 2d 320, 327 (Del. 1964) (attorneys' fees were a percentage of tangible benefits to the defendant corporation and additional compensation for intangible benefits based on the time expended and the effort exerted by plaintiff's counsel).

²⁴⁰ See Ardit & Flapleton, *supra* note 154 at 77. Case law in the area left open question as whether non-voting stock or preferred or special stock with limited voting power had preemptive rights, whether stock issued for property or services rendered, rather than cash, was subject to preemptive rights, and how preemptive rights applied in a multi-class or multi-series situation. See *Yoakam v. Providence Biltmore Hotel Co.*, 34 F. 2d 533, 538-9 (D.C.R.I. 1929).

"The right of shareholders to subscribe for new shares issued by a corporation as an increase of its capital stock in preference to outsiders is well established, and is called a shareholder's preemptive right." 240

In 1967 such common law rights were abolished but charter provisions can expressly grant pre-emptive rights. 241

B- TRANSFER OF SECURITIES

Prior to 1967 the Delaware case law cast doubt on the validity of an agreement that a stockholder could not transfer his stock without the consent of the corporation or first fellow stockholders. 242 and suggested that a right of first refusal in the corporation might be invalid unless it was somehow related to the objects and purposes of the corporation. 243

Section 202 of the present Delaware Corporation Code validates the following restriction: whether imposed in the certificate of

²⁴⁰ **Kingston v. Home Life Ins. Co. of Am.**, Del. Ch., 101 A. 336 (1917), *aff'd*, Del. Supr., 101 A. 25 (1915).

²⁴¹ 3 Del. C. 312 (a) (3) (Del. Gen. Corp. C. 406 (board of directors may issue securities without first offering them to shareholders of any class); 111 Del. Corp. Act 650 (1962 revision, abolishing statutory preemptive rights); 115 Del. Corp. Act 505 (preemptive rights can be established by certificate); Tex. Pub. Corp. Act 219, 222-1 (limitation or denial of preemptive rights is permitted by articles of incorporation).

²⁴² **Greene v. E.H. Rollins & Sons, Inc.**, 2 Del. Ch. 394, 2A 301 249 (Ch. 1938).

²⁴³ **Lawson v. Household Finance Corporation**, 17 Del. Ch. 343 152 Atl. 723 (Sup. Ct. 1930).

incorporation, in the by laws or in a stockholder's agreement: a) rights of first refusal granted to the corporation, any holders of securities and/or anyone else and exercisable within a reasonable time; b) restrictions which involve an obligation of the corporation, any holders of securities, and/or anyone else to purchase the restricted securities; c) restrictions requiring the approval of the directors, or of the holders of any class of securities, as a prerequisite to transfer; d) restrictions prohibiting transfer to designated persons or classes of persons, if such designations are not "manifestly unreasonable" 244

The restriction must be stated conspicuously on the stock certificate. 245 The term "security" has been construed as to include under certain circumstances, namely, bonds, debentures, notes, and other forms of corporate ownership or indebtedness. 246

1. REFINANCING, PURCHASING AGREEMENTS

Since 1907, the Delaware Corporation Code has permitted a board of directors to sell substantially all the assets of the corporation when

U.S. Del. C. 242 (c). See Cal. Corp. C. 401 (articles of incorporation may establish and modify privileges and restrictions); Ill. Bus. Corp. Act 605 (articles of incorporation should state "qualifications, limitations and restrictions"); N.Y. Bus. Corp. Act 502 (preferences and limitations may be fixed in the certificate of incorporation or by the board of directors); Tex. Bus. Corp. Act 2.19. 242 (reasonable restrictions may be imposed in articles of incorporation, by laws or written agreement).

244 See Archt & Stadelton, *SUPRA* note 135 at 63.

245 Joseph E. Seagram & Sons v. Conoco, Inc., 519 F. Supp. 506 (D. Del.).

authorized by majority of stockholders either in a meeting or by written consent. Since 1937, it has allowed a corporation to dispense meetings where all stockholders send their written consent to the proposed action. ²⁴⁷

Since 1967, the Code also authorizes a corporation to adopt a charter provision permitting it to take all or some actions, including the election of directors, with written consent of the majority of stockholders, so long as the majority required in the charter provision is not less than the minimum majority required by the Code for the type of action involved. ²⁴⁸ Such written consent may be given by proxy. ²⁴⁹

The procedure has certain limits. The law requires that prompt notice of the decision subject without meeting be given to these stockholders or persons on the board who have not sent written consent. ²⁵⁰ Unless a written waiver can be obtained. ²⁵¹ One further point that when an election of directors is at stake, a policy of majority vote controls for

²⁴⁷ Arch. & Johnston, *supra* note 136 at 11.

²⁴⁸ 31 USC § 243. See Cal. Corp. Code, which otherwise provided in articles of incorporation may be taken without meeting and notice of written consent is signed by proper shareholder's majority, 111 Cal. Corp. Act § 710 (1967) except for voluntary dissolution of corporation and conditioned to proper notice to all shareholders, 117 Cal. Corp. Act 611 (whenever shareholders can take any action by vote, such action may be taken without meeting or written consent), 1967 Cal. Corp. Act § 106 (any action reserved to be taken at a meeting may be taken without a meeting with consent in writing).

²⁵¹ 31 USC § 243.

proxy are equally susceptible to contest for consents; hence, consent forms must permit choice from among nominees, and certain statements in solicitation can be materially misleading. 252

The Ch. 11 provides that when more than 10 months have elapsed without a meeting of shareholders to elect directors and application is made by a shareholder for Court intervention, the Court has power to make sure that such meeting and election take place as promptly as possible. 255 It also provides that it has no right of shareholder to vote his stock to elect directors or any other officer, but he can vote selfishly or for the benefit of the corporation and not be impaired into by the Court. 256

THE STATEMENT OF THE BOARD

The statement of the board of directors is a document to the corporation's shareholders and is a resolution of the board of directors.

directors, to be considered by a special or annual meeting of shareholders. 256

Delaware courts have dealt with the issue of the "substantial interest" of a charter amendment. In 1906, the Delaware Supreme Court held that a charter amendment proposed to extend the term of office of directors but undeclared dividend was a part of a reorganization was valid, based on the stockholder's vested rights. 257

However, in 1943, the same court held that undeclared but undeclared dividend could be returned to stockholders by merging a corporation into a wholly owned subsidiary formed for that purpose. 258 In 1943, following this precedent, a Federal Court, applying Delaware corporate law, held that a parent corporation may merge with a wholly owned subsidiary if the merger is not to return undeclared preferred stock to the shareholders. 259

 (S.D.N.Y. 1944)

"[t]he right of the controlling stockholders to amend, though pursuant to charter authority, must be exercised with fair and impartial regard for the right and interest of all of the corporate stockholders of every class, and not for the sole benefit of particular classes, to clear premises of other outstanding claims." 264

Even though there is a presumption of fairness when majority of the stockholders and directors, acting in good faith, speak for the corporation by taking action under appropriate statutory and charter provisions, "the exercise of power to amend is subject to review by courts of equity to determine whether there has been an oppressive exercise of power granted." 265 However, the motive of a change is not a relevant consideration in determining the question of fair dealing. 266

See 264-265 *supra* note 263.

Section 24 provides that directors of a corporation shall have ample authority to manage the corporation from time to time and conduct its affairs in conformity with the purposes of the corporation. It is held that the corporation has not

corporation's issuing shares of any class in a number in excess of 20% of the number of shares of the same class which it had outstanding immediately before the merger. 17%

1. CONCLUSION

The proposed merger of the Delaware Corporation Law provides the procedural authorization for the merger of domestic corporations and foreign corporations and stipulates that the agreement to merge shall be subject to the approval of the members of converting the shares of the constituent corporation into shares of the resulting corporation.

It is to be noted that the law permitted only mergers in which there is no exchange of shares of the constituent corporations solely for shares of the resulting corporation. But the Delaware

law provides that if the corporation is a corporation of the United States or has been approved or requested by the corporation or its shareholders for merger with one or more other corporations, a share of or right in or interest in or ownership in a corporation, preferred shares reserved and subject to the provisions of Act 11 of any foreign corporation owned at least 10% of outstanding shares of each class of any other corporation may, except such subsidiary without approval by vote of shareholders, by Y. P. Corp. Act 1955, any corporation owning at least 10% of outstanding shares of each class of another corporation may merge with other corporation without shareholder authority, Tex. Bus. Corp. Act 1955, shareholder approval is not necessary for mergers in which parent corporation owned at least 10% of shares of each class of stock of subsidiary.

Supreme Court held that these words did not limit the general authority conferred by the statute. 274

There were a series of legislative amendments. In 1941 the statute was expanded by changing the dubious phrase to "into shares or other securities of the corporation resulting from or surviving such consolidation or merger." 275 In 1945 a provision was added to both sections specifically authorizing the payment of cash for fractional shares. 276

Section 277 of the statute, which had previously prescribed a procedure for the liquidation of a parent and a wholly owned subsidiary, was amended to include merger of a parent and a 90% owned subsidiary. The children of the parent of a corporation of the parent corporation, the merger should not be carried out, each or the corporation of the parent should be delivered by the surviving corporation to the children of each share of the subsidiary corporation to be delivered to the parent.

In 1967 the Delaware Corporation Code expanded the types of consideration that may be exchanged for shares of constituent corporations by specifically naming cash, property, rights or securities of corporations not involved in the merger along with rights or other securities of the surviving corporation.²⁷³

2. MERGER'S FAIRNESS AND PURPOSE

Concerning the question of "fairness" in matter of mergers, the basic rule is that a merger should not promote interests of one class of stockholders to the detriment of another.²⁷⁴ Matters which present a "going private" transaction call for the strictest observance of a fiduciary duty that is "commensurate and falls alike on those who control at least 90 percent of the outstanding shares, and those who control a majority but less than 90 percent."²⁷⁵

However, neither the benefit of the promoters²⁷⁶ nor the inadequacy of

²⁷³ 38 Del. C. 231 (b) (see Del. Corp. C. 409 (shares may be issued for such consideration as is determined by directors or shareholders, consisting of money paid, labour done, services rendered, debts or securities cancelled, property received); 111 Del. Corp. Act 625 (shares may be issued for such consideration as shall be authorized by board of directors); N.Y. Bus. Corp. Act 504 (consideration for issue of shares must consist of money or other property, tangible or intangible, or labour or services actually received by the corporation); Tex. Bus. Corp. Act 21b (consideration for shares must consist of money paid, labour done or property received, promissory notes or promise of future services cannot be payment or part payment for shares).

price 282 are sufficient evidence of constructive fraud inducing a consolidation. 283 The burden of proof is demanding

"[...] unfairness must be so clearly demonstrated as to impel the conclusion that it emanates from acts of bad faith, or a reckless indifference to the rights of other interested parties, rather than from an honest error of judgment..." 284

"[...] it must be plainly demonstrated that the overvaluation or undervaluation, as the case may be, is such as to show a conscious abuse of discretion before fraud at law can be made out..." 285

The burden of proof is upon objecting stockholders. 286 (because there is a presumption of **bona fides** of purposes). 287 except when defendant has acted as co-director, and on both sides of the transaction through the control of the corporate machinery, in which case the burden of proof shifts to defendant. 288

288 *Harman v. Masoneilan Int'l Corp.*, Del. Supr., 442 A 2d 487 (1983)

The reason for merger or the business necessity behind it are not matter for judicial determination. 280

"Delaware corporations may merge into a single corporation and whether such a transaction is good or bad, enlightened or ill advised, selfish or generous is not for Delaware court to inquire into the reasons." 280

In **Singer v. Magnavox Comp.**, 281 the issue was the violation of controlling shareholders' fiduciary duties by attempting to consummate a merger which did not serve any purpose other than the elimination of minority shareholders at an inadequate price.

The defendant's argument was premised upon the proposition "that the shareholders' rights in, exclusively in the value of their investment, not in its form" and "that a controlling shareholder has no legally protected rights in his shares beyond the right to be paid fair value."

The Court rejected this contention. Investors have legally protected rights in the form and in the value of their investment. A "proper and independent business purpose" for the merger of a corporation is necessary to justify the elimination of its minority shareholders.

See **Bruce v. E.H. Bruce Co.**, 194 Del. 174 A. 2d 29 (1961).

280 **Tanzer v. International Gen. Indus., Inc.**, Del. Ch., 402 A. 2d 382 (1979).

281 380 A.2d 901 (Del. 1977). A majority stockholder of Magnavox attempted to acquire the rest through a merger. The other stockholders received notice of the proposed merger and price. Shareholders who decided not to accept the offer could seek the appraisal remedy.

"a merger, under this section [8 Del. C. 251] made for the sole purpose of freezing out minority shareholders, is an abuse of the corporate process, and a complaint, which so alleges, states a cause of action for violation of a fiduciary duty for which the court may grant such relief as it deems appropriate under the circumstances." 282

In *Roland* the Supreme Court held that the fiduciary duty owed by the majority to the minority of stockholders may not be circumvented by full compliance with procedures required by corporation statutes, nor is it discharged by restricting minority shareholders to an appraisal remedy.

In addition to the "business purpose," the Court held further that the fiduciary duty requires that the merger meet the requirement of "entire fairness," principle first was reiterated in *Young v. Valhi, Inc.*,²⁸³ where the Court of Chancery stated that

"The use of technically correct but devious corporate action on the part of a parent corporation, for the purpose of accomplishing a merger designed to eliminate minority shareholders of the subsidiary, is a manipulation of corporate machinery contrary to the strict standards of fiduciary behavior required of majority stockholders by the Supreme Court of Delaware." 284

However, in *Weinberger v. UOP Inc.*,²⁸⁵ the Supreme Court held that in

²⁸² *Ibid.* at 962.

²⁸³ 36 Del. Ch. 382 A 241 (1972).

²⁸⁴ *Young*, *supra* note 142 at 1372. Applied in *Bershad v. Curtiss-Wright Corp.*, Del. Supr., 535 A 241 (40) (1987).

²⁸⁵ Del. Supr., 457 A 241 (1983).

parent-subsidiary mergers the "fairness test," the appraisal remedy, and the Court's discretion, awarded enough protection to minority shareholders. Therefore, "no additional meaningful protection is afforded . . . by the business purpose requirement" of **Singer, Tanzer and Roland**. That requirement was expressly abrogated.²⁹⁰

More recently the Court of Chancery have held that the "business judgment rule" never prevents the enforcement of the disclosure duties in cases of mergers and acquisitions:

"The question whether shareholders have been provided with appropriate information upon which an informed choice on a matter of fundamental corporate importance may be made, is not a decision concerning the management of business and affairs of the enterprise of the kind the business judgment rule is intended to protect, it is rather a matter relating to the directors' duty to shareholders." ²⁹¹

In the same case the court attempted to avoid the effects of a choice between the "business judgment rule" and the "intrinsic fairness test," and suggested that in the event of takeover bids, "a flexible, intermediate form of judicial review is appropriate."²⁹² Where the court analyzed and defensive measures against a threat of change in the control of a company, it will inquire, first, if there were some basis to conclude that a proper "corporate purpose" was served by the

²⁹⁰ *Ibid.*

²⁹¹ **AC Acquisitions Corp. v. Anderson, Clayton & Co.**, 661 Ch. 540 A.2d 100 (1995).

²⁹² *Ibid.*

defensive measure, and second if the defensive measure is "reasonable" in relation to the threat of change in the control. 299

The doctrine of the **de facto** merger applies when there is a sale of substantially all the assets by one corporation to another, the stockholders of the former becoming stockholders in the latter, notwithstanding there is no merger or authorization for one. Thus, the rule that there can be no consolidated corporation *de facto* where there can be only one one, 300 has been invoked in many cases for the protection of creditors or stockholders who have suffered an injury by reason of failure to comply with the statutory requirements. 301

Although the right to an exit of shareholders who are dissatisfied with the effect or the terms of the merger is admitted, the Delaware courts have held that "public policy" does not permit a dissenting shareholder, without an affirmative vote, to veto a merger agreement if its terms are "fair and equitable in the circumstances of the case." 302

Since the Delaware Legislature enacted Section 203 303 that forbids any business combination between a corporation and any interested

stockholder for a period of 3 years following the date that such stockholder became an interested stockholder, unless there is approval by the board of directors or the stockholders by qualified majority.³⁰⁴ The restriction does not apply when the certificate of incorporation or the by laws contain a express provision for that purpose, or the corporation does not require vote of stockholders for a merger sub. Among the business combinations not restricted are mergers or consolidation, sale of assets, insurance and transfer of stock, an interested stockholder" is any person or entity owning 10% or more of the corporation.³⁰⁵

3. PROXIES

In *American Hardware Corp. v. Savage Arms Corp.*,³⁰⁶ the court dealt with an anti-takeover maneuver involving proxy contests. The Court said that

§9-3.1(b) of 2003 (N.Y. Bus. Corp. Act §136) certain business combinations require affirmative vote of 60% outstanding voting shares and majority of outstanding voting shares held by the interested shareholders; N.Y. Bus. Corp. Act §137 (b) certain business combinations prohibited with interested shareholder owning at least 10% of voting stock, prohibited for five years after date such shareholder attains 10%, unless approved by board before shareholder attains 10%.

³⁰⁴ N.Y. Bus. Corp. Act §136.

³⁰⁵ N.Y. Bus. Corp. Act §137.

³⁰⁶ 77 Fed. Cl. 100 (1990). The defendant (Savage) owned 10% of the stock of the plaintiff (American) and was preparing a registered statement to make a tender offer. In response, the defendant corporation's Board authorized the purchase, with its own shares, of stock of another corporation, in order to "locate more equity into friendly hands before the tender offer. The purchase was conditioned upon approval of stockholders and a meeting was called for that purpose.

of temporary disclosure of the necessary information and inspection of the stockholders. They are required only to enable plaintiffs to complete the registration statement of the tender offer, but not to participate in stockholders' meeting convened with other purposes.

Accordingly, whether or not a proxy statement was misleading in not mentioning the number of directors opposed to the maneuver, the Court held that, although it is preferable to state all the facts, for the proxy statement to be in compliance with all the requirements of the proxy rules does not constitute a violation.

The effect of a general proxy was limited in *Dolese Bros. Co. v. Brown*,¹⁰⁰ when the court stated that

... the rule that a stockholder cannot repudiate action taken under a general proxy has no application to a case in which the defendant director is charged with using the proxies to commit fraud committed from the stockholders whose vote is necessary to accomplish it, and in which no right of third parties is affected.

When stockholders have no knowledge that a certain resolution was to be introduced at the meeting or were informed that the management of the corporation intended to prevent other resolutions, stockholders are not

stopped by the proxy from asserting their rights. 311 The court may exercise discretion in determining whether material misrepresentations made during a proxy solicitation campaign warrant the ordering of a new election, according to Justice Brandeis. 312

4. APPRAIAL RIGHTS

Before 1937, the stockholder of any merging Delaware corporation could receive the "appraisal value" of his or her shares by objecting to the transaction in writing prior to the stockholder vote and complying with a prescribed procedure. 313 An appraisal right was not granted, however, to stockholders who dissented from a sale of substantially all of the assets of the corporation, or from any other corporate change or to a stockholder whose corporation merged into another corporation in which it owned 10% or more of each share of stock. 314

Based upon that provision, the Delaware Supreme Court refused to apply the "disproportionate" doctrine in **Hariton v. Arco Electronics, Inc.** 315

313 *Gottlieb, supra* note 301 at 11.

312 *In re Seminole Oil & Gas Corp.*, 60 Del. 2d 20 (1969), *app'l dis'd*, 361 A.2d 262 (1976).

313 Excepted the stockholder of a parent corporation in a short-term merger. *Arco Electronics, Inc. v. Hariton*, *supra* note 315 at 11.

314 *Arco Electronics, Inc. v. Hariton*, *supra* note 315 at 11.

315 41 Del. 2d 241 (1974), 361 A.2d 262 (1976), *cert'ied* by *supra* note 314 at 11.

and in **Orzeck v. Englehart**, 319 and held that no appraisal rights existed where two corporations were combined pursuant to a plan which, although contemplated under other sections of the Delaware Corporation Code, had the same ultimate effect as a merger. 317

The 1909 statute eliminated the appraisal right in a merger for shares of any class of stock which are either registered on a national securities exchange or held or owned by not less than 1000 stockholders. 316 And as amended, such a deemed stockholder of a corporation which merges with another corporation and does not, in the process of the merger, operate its charter or increase any class of stock of either corporation, is not then 317, 318 that is to say when no stockholder is then deemed to object to the merger.

10. **Supra** note 11 at 317

In **Hariton**, the transaction involved the sale by a corporation of all of its assets and the formation of a new corporation to purchase the assets and carry on the business. In **Orzeck**, the transaction involved the sale by a corporation of all of its assets and the formation of a new corporation to purchase the assets and carry on the business. In **Orzeck**, the transaction involved the sale by a corporation of all of its assets and the formation of a new corporation to purchase the assets and carry on the business.

11. **Supra** note 11 at 317

Under the 1909 statute, each holder of 100 shares of stock (each holder of 100 shares who is approved as required under merger) and those in receipt of such shares may require a foreign corporation to purchase such shares for a certain fair market value, no exception; 111 Bus. Corp. Act 111. In 1929, shareholders dissenting from merger, consolidation or sale of assets (collectively all read are entitled to fair value for shares upon proper objection), N.Y. Gen. Corp. Act 310 (no appraisal rights for shareholders of surviving corporation in short form merger or in any other merger unless such merger alters or establishes preferential, preemptive, redemption or vote rights), Tex. Bus. Corp. Act 5.11 (dissenting shareholder who has filed written objection prior to shareholder vote may demand payment of fair value of his shares, no exception).

However, the appraisal right exists if the certificate of incorporation so provides or if a stockholder's shares are not converted by the merger solely into stock of the surviving corporation. To exercise this right the shareholder must file his objection to the merger before the vote is taken; shareholder need not vote against but he must not vote in favour of the merger. 321

In any event a stockholder may object to a merger if its terms are so outrageous that they are beyond the scope of "honest business judgment." 322 In *Leggett v. Leggett*, 104 Cal. 2d 100, 34 Cal. 2d 100, 221 P.2d 100 (1950), the court, in describing the stockholder's burden of proof in order to obtain rescission of a merger or a recapitalization by amendment of the certificate of incorporation, merely suggested that the courts have not established a definite standard for determining the burden of proof in the merger case. 323 In *Leggett v. Leggett*, 104 Cal. 2d 100, 221 P.2d 100 (1950).

As we have here developed, the appraisal provision has varied very much. The Supreme Court has recognized that the representative intent is to "allow corporate shareholders to get whatever they may be, subject

to the appraisal right."

321 *Cole v. National Cash Credit Ass'n*, 13 Cal. 2d 47, 156 Atl. 10 (Cal. 1937). There are exceptional circumstances under which a shareholder may object to a merger or election to accept the merger or to demand the value of his stock in money but may entitle the holder of a certificate of equity to restrain the consummation of the merger. (*Porges v. Vadsco Sales Corp.*, 19 Cal. 2d 42, 134 P.2d 194 (1943)).

322 See *Bruce*, *supra* note 30 at 20; *Schiff v. RKO Pictures Corp.*, 34 Cal. 2d 330, 104 P.2d 622 (Cal. 1941) [case of merger]; *Davis v. Louisville Gas & Electric Co.*, 16 Del.Ch. 157, 142 Atl. 654 (Ch. 1928) [charter amendment]; *Porges*, *supra* note 31 at 143 [merger].

only to the narrow limitation that one cannot take speculative effects of the merger into account.³³⁵ Therefore the statutory requirements are to be strictly construed for the protection of objecting stockholders, within the boundaries of orderly corporate procedures and the purposes of the requirement.³³⁶ Proof that shareholders have complied with the requirements is enough to establish their right.³³⁷

The proposed right of a statutory order that compensate for the consequences of the common law rule that a single shareholder could block corporate action by establishing a veto to the statutory duty of the corporation to comply with the instructions of its stockholders as to the corporation's business and financial policy is not sound. Hence, the effect of the proposed statutory order on the corporation will result in the corporation acting in the favor of the stockholder or stockholders about the business of the corporation.

The proposed statutory order that the corporation, which develops, deliberates and executes a business plan, is not responsible for overreaching are

involved, the Chancellor's powers are complete "to fashion any form of equitable and monetary relief as may be appropriate." 328 In other cases, the court has emphasized that a determination of "fair value" does not involve an inquiry into claims of wrongdoing. 329

Stockholders may split votes and apply for appraisal as to some of their shares, 330 but otherwise, an appraisal demand cannot split stock to seek appraisal of a portion. 331 In a case where a minority stockholder requested an order from majority stockholders to effect a merger, such a request was held to be subject to appraisal. 332 There is a simple procedure in which all the dissenting stockholders who have perfected their right to appraisal can participate. 333

Stockholders' remedies are made more adequately protective when they are subject to appraisal, which is the remedy for which the holder

is entitled to vote. Any way to improve the method, which the majority can use to its advantage in the financial community and elsewhere, should be in court.

The appraiser have great latitude in seeking evidence from which it may ascertain the value of the shares to be appraised, even apart from that supplied by the parties.^{34b} Appraisers should state the value of the elements given independent weight and the weight given to each in order to disclose the valuation process.³⁵ Little less arbitrary and [] generally accepted method or procedure.³⁶

The appraisal of the value of the transaction involve two basic aspects, the method and the value. The quotation in **Weinberger** states, that

The appraisal of the value of the transaction involves a consideration of when the transaction was formed, the nature of the transaction, structured, negotiated, and approved by the directors, and how the approvals of the directors and the stockholders were obtained. . . . Fair price means the economic and financial considerations of the proposed merger, including all relevant factors: Assets, liabilities, earnings, future prospects, and any other elements that affect the intrinsic or inherent value of a company.³⁷

The appraisal is to be made for the selling shareholders. They are entitled to receive the intrinsic value of their share on a going concern basis. . . . they are entitled to receive that sum which

value of the land, and the costs of the use of the land are accepted additional criteria. 347

In assessing interest the Court of Chancery has established a rate at which a prudent investor could have invested money rather on how much it would have cost the corporation to borrow the money. 348 Concerning the rule is that the Court of Chancery tax all the appraisal costs against the surviving corporation in absence of a showing of bad faith on the part of the dissenting shareholders, that is to say, that the statutory procedure was made use of for the purpose of being "bought out." 349

RIGHT OF INSPECTION

Delaware gives shareholders a broad statutory right to inspect corporate books and records including lists of stockholders, provided that there is a "proper purpose," that is, a purpose reasonably related to their interest as shareholders. 350 In order to avoid themselves of this right, the Delaware Code requires shareholders to hold their stock for any

³⁴⁷ *Racing*, *supra* note 317 at 275.

³⁴⁸ *Lebman v. National Union Elect. Corp.*, 120 Ch. , 414 A.2d 824 (1980).

³⁵⁰ *Del. Code* § 225.

minimum period, or to own a significant amount of stock.³⁵¹ And any provision in the certificate of incorporation limiting the inspection is void.³⁵²

Concerning the "proper purpose" Delaware courts have held that it is an interest not adverse to the interest of the corporation.³⁵³ Thus:

"The right of stockholder under this section is absolute unless the corporation is able to show that the purpose of examination is to gratify idle curiosity, or if for an improper or unlawful purpose, or for a purpose purely individual and in no way germane to the relationship of stockholder to the corporation."³⁵⁴

Hence the mere possibility that stockholder seeking inspection might use the information obtained to harm the corporation is not ground for any

³⁵¹ For analysis and comparison with other states, see Macey & Moller, *supra* note 152 at 513 and Comment, *supra* note 142 at 1637. Cal. Corp. C. 1600, 1601 (shareholders have rights of inspection as to shareholders' records: an accounting books, records and minutes, no exceptions), Ill. Bus. Corp. Act 7-7/8 (any shareholder has right to examine for any proper purpose corporation's books and records of account, minutes, and record of shareholders, and to make extracts therefrom; no exceptions), N.Y. Bus. Corp. Act 624 (anyone who is shareholder for at least 6 months or holds at least 1% of any class of shares, has right to examine, in person or by agent, minutes of shareholder proceedings and record of shareholders); Tex. Bus. Corp. Act 2.44 (any shareholder for 6 months or of at least 1% share can, upon written demand stating purpose, examine records and make extracts).

V

DELAWARE AND MANAGEMENT

FIDUCIARY DUTIES OF DIRECTORS, INCORPORATORS, STOCKHOLDERS AND THIRD PARTIES

A. THE "BUSINESS JUDGMENT" RULE

This rule states that courts will not interfere with directors (or stockholders) business judgment, 366 unless there is fraud or alleged misfeasance, 367 fraud, actual or presumed, or alleged or ultra vires.

366 *Mercantile Trading Co. v. Rosebaum Grain Corp.*, Del. Ch., 154 A 157 (1931), *Perrine v. Pennroad Corp.*, Del. Ch., 43 A 2d 721 (1945), *aff'd*, Del. Supr., 47 A 2d 479 (1946), *cert. denied*, 329 U.S. 603, 47 S.Ct. 620, 91 L.Ed. 600 (1947), *Kaplan v. Centex Corp.*, Del. Ch., 334 A.2d 119 (1971), *Kaplan v. Goldsamt*, Del. Ch., 330 A.2d 556 (1972), *Partners v. Newmont Mining Corp.*, Del. Supr., 535 A.2d 1334 (1987).

367 *Sandler v. Schenley Indus., Inc.*, 73 A 2d 906 (1951), *Lewis v. Hat Corp. of Am.*, 150 A 2d 750 (1959), *Puma v. Marriot*, Del. Ch., 263 A 2d 696 (1971).

misconduct must be shown to justify an interference by the courts with questions of corporate policy and management." 368

There is a presumption that the judgment of directors of corporation was formed in good faith and was designed to promote the best interests of the corporation. 369 The presumption is not disturbed if any "rational business purpose" can be attributed to the decision; 370 thus an "honest mistake" of business judgment on part of the directors is not reviewable by court. 371

UNITED STATES RELATIONSHIP

Director's conduct in fiduciary relation to corporation and its shareholders. 372 Sometimes Delaware courts have maintained that their authority should not be tested by the rules that govern the relations of directors to shareholders. 373 But, if a director acts from the utmost good

1. *Mercantile*, supra note 368, at 369.

Byllesby & Co.*, Del. Ch., 12 A.2d 173 (1942), 194 Del. Supr., 38 A.1d 808 (1944), *Petty v. Penntech Papers, Inc.*, Del. Ch., 347 A.2d 140 (1975).

6. *Loft, Inc. v. Guth*, Del. Ch., 2 A.2d 225 (1938), *aff'd*, Del. Supr., 19 A.1d 533 (1939), *Harriman v. E.I. DuPont De Nemours & Co.*, 372 F. Supp. 101 (S.D. Del. 1974).

faith and fair dealing," especially where their individual interests are concerned.

Moreover, Delaware courts have held that there is a fiduciary relationship between the promoters of a corporation and the corporation itself because "those who undertake to form a new corporation, to procure for it the capital through which it may carry out the purpose or purposes for which it was formed, are necessarily charged with the duty to act in good faith in dealing with it."³⁷⁴ Incorporators cannot benefit from any "secret profit" which they may received at the expense of the corporation or of its stockholders and the corporation may recover such a profit.³⁷⁵

Fiduciary duties arise from the exercise of powers by any person who undertakes to dictate the destiny of the corporation, even absent any intrusion in the affairs of the board of directors.³⁷⁶ Hence, "control" and "domination" may be exercised directly or through nominees. It is enough to direct the corporate conduct "in such a way as to comport with the wishes or interests of the corporation or persons doing control."³⁷⁷

³⁷⁴ *Henderson v. Bennett*, 101 Sup. , 137 A. 2d 377 (1959); *Henderson v. Plymouth Oil Co.*, 101 Ch. , 136 A. 140 (1947), *aff'd*, 101 Sup. , 141 A. 197 (1953).

³⁷⁵ *Nye Odorless Incinerators Corp. v. Felton*, 101 Sup. , 132 A. 504 (1953).

³⁷⁶ *Harriman*, *supra* note 373 at 1113.

³⁷⁷ *Centex*, *supra* note 360 at 551.

Therefore, a non-stockholder who usurps the function of the board of directors and otherwise directs its activities assumes the same fiduciary duty as directors have. The same happens to one who exercises control over a corporation which in turn exercises control over another corporation.³⁷⁸ A controlling shareholder held directly or indirectly by one or a third party in name³⁷⁹ or through any other means.³⁸⁰

"When, in the conduct of the corporate business, a majority of the voting power in the corporation join hands in imposing their policy upon all, they are to be regarded as having placed upon themselves the same sort of fiduciary character which the law imposes upon the directors in their relation to the stockholders."³⁸¹

In *Merritt v. Colonial Foods*,³⁸² the Court said that when a controlling stockholder exercises his power to set the terms of a self-dealing transaction and compels its consummation, he assumes a responsibility to establish to an independent body (court, independent directors or shareholders) as "full information" that the transaction was "fully fair."³⁸³

³⁷⁸ *Harriman*, *supra* note 373 at 1011.

³⁷⁹ *Italo Petroleum Corp. of Am. v. Producers Oil Corp. of Am.*, 193 F.2d 174 (CA-1, 1956) (1964).

³⁸⁰ *Speiser v. Baker*, Del. Ch., 525 A.2d 1001 (1987).

³⁸¹ *Allied Chem. & Dye Corp. v. Steel & Tube Co. of Am.*, Del. Ch., 5 A.2d 488 (1949).

³⁸² 193 F.2d 174, 505 A.2d 737 (1986).

"Should a reviewing court be required to pass judgment upon the fairness of such a transaction, the self-dealing fiduciary may be required to respond in damages; or with another appropriate remedy if the transaction, despite any good faith on his part, is found to be not an entirely fair one to the corporation or to the minority shareholders." 303

More recently the Delaware Supreme Court has held that the board of directors may deal selectively with the stockholders, so long as the directors "have not acted out of the sole or primary purpose to entrench themselves in office." 304

C. SCOPE OF FIDUCIARY DUTIES

Delaware courts, and federal courts applying Delaware law, have developed the legal rules on directors' duties of care and loyalty. Such decisions have evolved variously during the present century and surely will evolve in the future.

Broadly speaking, no matter how gross a fraud, ultra vires act, or act of imprudence or negligence on the part of those charged with the management of the corporation, the offending directors or officers, and not the corporation, are liable. 305 And the fact that a charter or by-law provisions may technically permit an action contemplated by the

³⁰³ *Held*.

³⁰⁴ *Frantz Mfg. Co. v. EAC Indus., Inc.*, 39 Del. 401 (1964).

³⁰⁵ *Harden v. Eastern States Pub. Serv. Co.*, 361 Ch. 122 (A. 705 (1963)).

directors does not automatically insulate directors against courts' scrutiny of purpose.³⁰⁵

However, courts have restricted the "intrinsic fairness test" to validate the responsibility of directors and officers in respect with certain transactions. In approving a merger based on a claim of a necessary reorganization of corporate assets, the Court held that it must be plainly demonstrated that the overvaluation or undervaluation of property is the best possible business description before fraud at law can be made out.³⁰⁶

³⁰⁵ *Young v. City of A.*

In *Guth* the law's court made the objective expectation of the public policy that demands of officers and directors loyalty to corporation:

"A public policy, which through the years, and derived from a profound knowledge of human characteristics and motives, has established a code that demands of a corporate officer or director, peremptorily and inexorably, the most scrupulous observance of his duty, not only affirmatively to protect the interests of the corporation committed to his charge, but also to refrain from doing anything that would work injury to the corporation, or to deprive it of profit or advantage which his acknowledged character might properly bring to it, or to enable it to make in the reasonable and lawful exercise of its powers."

³⁰⁵ *Petty, supra* note 373 at 140.

³⁰⁶ *Muschel, supra* note 358 at 364.

³⁰⁷ *Guth, supra* note 373 at 503.

A few years later the Court of Chancery restated the extension of the fiduciary relationship:

"if an officer or a director of a corporation, in violation of his duty, as such, acquires gain or advantage to himself, the law charges the interest so acquired with a trust for the benefit of the corporation and its directors while it denies to the betrayer all benefit and profit."⁸⁸⁰

Conversely a corporate officer or director is entirely free to engage in independent competitive behavior so long as he violates no legal or moral duty with respect to the fiduciary relationship.⁸⁸¹

A. PAYMENT OF INTEREST

In *Sinclair Oil Corp. v. Levien*,⁸⁸² involving excessive distribution of dividend to the subsidiary, the court recognized that "parents" owe "a fiduciary duty to their subsidiaries" but held that "the transaction between them should be tested by the 'business judgment rule' and not by the application of the 'intrinsic fairness' test" when the parent had not received a benefit to the exclusion and at the expense of the subsidiary.

⁸⁸⁰ *Gottlieb*, Del. Ch., 20 A 2d 743 (1941).

⁸⁸¹ *Craig v. Graphic Arts Studio, Inc.*, Del. Ch., 166 A 2d 444 (1960).

⁸⁸² 280 A 2d 717 (Del. 1971). Criticized by Cary *supra* note 142 at 680. Sinclair was majority stockholder of Sunco. At Sinclair's direction Sunco paid out, for several years, dividends in excess of earnings. Probably for that reason Sunco's activities declined and there was no opportunity for expansion. A minority stockholder brought a suit claiming the existence of a fiduciary duty and its violation by Sinclair.

When all the subsidiary's stockholders received the dividends pro-rata, distribution did not represent self-dealing, an essential ingredient in invoking the intrinsic fairness test. Nevertheless the Court advised that

[I]f a plaintiff can meet his burden of proving that a dividend cannot be provided on any reasonable business objective, then the courts can and will interfere with the board's decision to pay the dividend." 392

In *Gabelli & Co. v. Liggett Group, Inc.*,³⁹³ the court held that if the parent corporation causes a subsidiary not to declare dividend solely for tax purposes, and "then the transaction would not be shielded by the business judgment rule but rather should be tested for intrinsic fairness."

As before, courts have accepted that the motives for causing the declaration of dividends are immaterial unless the plaintiff can show that the action "resulted from improper motive and amounted to waste."³⁹⁴ Accordingly, declaration of dividend, even in honest discretion of directors,³⁹⁵ as shareholder director cannot profit from allegedly

³⁹² *Sinclair*, note 4.

³⁹³ 101 Ch. 144 A 2d 31 (1983).

³⁹⁴ *Sinclair*, *supra* note 415 at 11.

³⁹⁵ *Treves v. Menzies*, 151 Ch. 147 A 2d 520 (1985).

declared dividends; and in such a case a corporation may assert the defence of lack of consideration. ³⁰⁶

Delaware case law has recognized that courts have the power to compel directors to declare dividends, after a demonstration that the corporation's affairs are in a condition justifying the declaration of the dividend as a matter of prudent business management; and that the withholding of dividends is based only on the theory of "an oppressive or fraudulent abuse of discretion." ³⁰⁷

On another theory, in case of the Delaware corporation law, the Delaware Supreme Court sustained the recovery on liability of directors for unauthorized payment of dividends and withdrawal of stock purchased or redeemed, ³⁰⁸ that is, recovery for the increase and restoration to the capital of the corporation of the entire amount thus illegally withdrawn and that each director individually is liable for the amount in question. ³⁰⁹

P. REDEMPTION OF STOCK, REDUCTION OF CAPITAL, AND RETIREMENT OF STOCK

Many courts have held that purchase of its own stock is not a function of a corporation,⁴⁰⁰ and may not impair capital, i.e., reduce the capital to less than amount represented by outstanding stock,⁴⁰¹ for protection of stockholders as well as of creditors. Although the rule is that in such cases the courts require of directors the "utmost good faith and good judgment,"⁴⁰² in some cases the "business judgment rule" has been applied.

A court has held that if one's own shares have been caused to be purchased by a corporation for an improper purpose, courts should not generally interfere with such a transaction when conducted in compliance with the statute.⁴⁰³

⁴⁰⁰ *Brophy v. Citicorp Sav. Co.*, Del. Ch., 70 A 2d 5 (1949). See also *Stephens v. Stephens Corp.*, 400 A 2d 100 (1979) (corporation may provide in its articles for redemption of corporation at price, time or happening of event); 11 Del. Code Ann. § 205 (redemption of shares may be made if corporation is not insolvent and corporation would be insolvent or become insolvent if amount payable to shareholders); N.Y. Bus. Corp. Act § 13 (corporation may redeem or purchase its shares out of surplus except when it would thereby be made insolvent); Tex. Bus. Corp. Act § 10 (redemption of authorized capital may be made by redemption and purchase of redeemable shares).

⁴⁰² *Propp v. Sadaacca*, Del. Ch., 175 A 2d 133 (1961), mod'd, Del. Supr., 197 A. 2d 485 (1965).

⁴⁰³ *Alcott*, *supra* note 401, at 501. See also *Crane Co. v. Harsco Corp.*, 511 F. Supp. 294 (D. Del. 1981).

In **Cheff v. Mathes**, ⁴⁰⁴ a case involving the purchase of its own shares by a corporation, the Delaware Supreme Court concluded that directors and officers had satisfied the burden of proof of his fiduciary duty by showing that there were reasonable grounds to believe a danger to corporate existence (or at least existence in its present form) because of the other company's stock ownership. By the way of analogy the court relied upon the Delaware cases permitting incumbent directors to use corporate funds in proxy contests.

Delaware could have constantly applied 8 Del. C. 160 (c) which deters a corporation from voting its own stock, to prevent those in control of a corporation from using corporate resources to perpetuate themselves in office. ⁴⁰⁵ Although according to the powers granted by 8 Del. C. 160 (c) stockholders at each with management may be bought out, Courts have insisted on the propriety of purchase.

"If the purchase of its own stock by the board was motivated by a sincere belief that the buying out of the dissident stockholder was necessary to maintain what the board believed to be proper business practices, the board will not be held liable for such decision, even though hindsight indicates the decision was not the wisest course."

"If the board in buying its own stock has acted solely or primarily because of the desire to perpetuate themselves in

⁴⁰⁴ 41 Del. Ch. 484, 194 A. 24 (1944). Affirmed by Cary, *supra* note 143 at 172. One company had purchased a substantial block of stock of another as the initial step toward a take over. The directors and the chief executive officer of the latter were concerned over this prospect and ultimately resorted to buying the former's holdings.

⁴⁰⁵ **Insituform of N. Am., Inc. v. Chandler**, Del. Ch., 534 A.2d 257 (1987). For foreign corporations, see **McDermott Inc. v. Lewis**, Del. Supr., 531 A.2d 206 (1987).

and use of the corporate funds for such purpose is improper." 406

Believing that the decision of the courts have held that where the use of corporate funds to purchase corporate shares will maintain management in control, the burden is on directors to justify the purchase as one primarily in the corporate interest and not in their own. 407 Concerning consideration for stock, the Delaware Supreme Court in **Bodell v. General Gas & Electric**, 99 Calabash in a flexible test.

"The directors may from time to time issue no-par stock for any consideration they may see fit, even though the price they fix is far below its actual value. But equity will, in accordance with the principles which prompt it to restrain an absolute power granted in absolute terms, lay its restraining hand upon the directors in exercise of an abuse of this absolute power." 408

"The no-par stock should be represented by market value issues of no par stock, not that no 'fair' to the corporation and existing holders, and not that it should yield the largest possible capital." "book value," "market value," "book value," and "sales value" are only labels for the same of no-par stock. 409

C SALES AND DISTRIBUTION OF ASSETS

The Court of Chancery has held that although the terms and conditions of the sale must conform to the best interest of the corporation⁴¹¹ the business judgment rule weighs in favor of directors' decision, unless the complaining shareholders can prove either intentional or inferred fraudulent misconduct.⁴¹² Here, inadequacy in price did not reveal fraud, the disparity must be so great as to lead the court to conclude that it was not due to an honest error of judgment, but rather to bad faith or to reckless indifference to the rights of others interested.⁴¹³ However, the burden of proof shifts when the seller company is obligated for the buyer and independent stockholder ratification cannot be given.⁴¹⁴

Next, § 471 requires majority shareholders' approval prior to board action on sale of assets,⁴¹⁵ when there is a sale of all or

⁴¹¹ *Allied Chem.*, *supra* note 34 at 406.

contracts or torts of the seller before the sale is consummated,⁴²¹ some sales of assets can be void when the transaction is "a fraud on creditors."⁴²²

In case of distribution of assets Delaware courts have protected small investors testing the "fairness" of the plan,⁴²³ to determine whether or not the dominating shareholders offering price was reasonable under the circumstances,⁴²⁴ because:

"[I]f through stock ownership, an individual was in a position to require a corporation to dissolve pursuant to this section [8 Del. C. 279] the individual was under an obligation to adopt a plan of dissolution which would be fair to all the stockholders of the corporation."⁴²⁵

For the protection of creditors and stockholders of dissolved corporations, section 279 may be invoked at any time if the company refuses or neglects to settle and close its business.⁴²⁶

⁴²⁴ *Ibid.*

⁴²⁵ 8 Del. C. 279. See *Harned v. Beacon Hill Real Estate Co.*, Del. Supr., 44 A 259 (1957); *Addy v. Short*, Del. Supr., 41 A 3d 300 (1951), rev'd, Del. Supr., 39 A 2d 125 (1952); *In re Citadel Indus. Inc.*, Del. Ch., 423 A 3d 500 (1986).

Before 1907 common law principles determined the effect upon a corporate transaction of the fact that officers or directors having an interest went from that of their corporation had participated in authorizing the transaction.⁴²⁶

After 1907 both the Corporation Code specifies three situations in which that fact will not affect the transaction's validity.⁴²⁷ a) where the material facts concerning the transaction itself are known to the board of directors, and the board, in good faith, authorizes the transaction by an affirmative vote of a majority of the disinterested directors present and voting; b) where the stockholders entitled to vote on the transaction have knowingly and informed and approved the transaction in good faith; the stockholder vote called for is one of all of the stockholders entitled to vote and not of the disinterested stockholders only; c) where the court finds that the terms of the transaction are, in fact, fair.

The corporate transaction lawfully approved by the board of directors or the stockholders, or both, may be overturned if a

⁴²⁶ A disinterested director could not be counted for purposes of establishing a quorum. (*Kerbs v. California Eastern Airways*, 33 Del. Ch. 87, 10 A. 2d 372 (1962)), unless a sufficient number of disinterested directors attended the meeting to constitute a quorum by themselves. Any transaction approved at the meeting could be overturned without regard to its fairness or to whether the transaction had previously received shareholder approval. (*Martin Foundation v. North American Rayon Corp.*, 415 F. 2d 105, 93 A. 2d 313, 418 (Ch. 1949)). See A. L. S. Popkewitz, *supra* note 419 at 41.

⁴²⁷ 1907 Code, C. 141 (a).

challenging stockholder proves that it could not have been the product of honest business judgment. 428

Delaware Courts have held that business opportunities of no interest to the corporation may be utilized by directors or officers but opportunities of interest must be not accepted.

"When a business opportunity comes to a corporate officer or director in his individual capacity rather than in his official capacity, and the opportunity is one which, because of the nature of the enterprise, is not essential to the corporation, and in one in which it has no interest or expectancy, the officer or director is entitled to treat the opportunity as his own, and the corporation has no interest in it. If, of course, the officer or director has not wrongfully embarked the corporation in business thereon.

If there is presented to a corporate officer or director a business opportunity which the corporation is financially able to undertake, is of a nature in the line of the corporation's business, and of practical advantage to it, in one in which the corporation has an interest or a reasonable expectancy, and by embracing the opportunity, the self-interest of the officer or director will be brought into conflict with that of his corporation, the law will not permit him to seize the opportunity." 428

In *now*, the corporation is not in a position, either financially or legally, to accept the opportunity, directors and officers are entitled

125 *See Aron & Stapleton, supra* note 4, at 113.

428 *Guth, supra* note 37, at 113; *Johnston v. Greene*, Del. Super., 171 A.2d 319 (1961); *Equity Corp. v. Milton*, Del. Super., 21 A.2d 494 (1965); *Kaplan v. Fenton*, Del. Super., 171 A.2d 324 (1971). The opportunity is "in the line of corporation's business," when the opportunity is presented to an embracing an activity as to which it has fundamental knowledge, practical experience and ability to pursue, which logically and naturally is attributable to its business having regard for its financial resources and is one that is consonant with its reasonable needs and aspirations for expansion. *Guth* (ibid).

to acquire it for themselves after the corporation has rejected it.⁴³⁰ In cases of dealing with the corporation, Delaware public policy requires the acts of corporate officers and directors "to be viewed with a microscope."⁴³¹

The burden is placed upon directors or officers to show either that the acts concerning a corporate opportunity were in the exercise of the "most good faith" to the corporation or that the offer was made to them in violation of it.⁴³²

The Delaware corporation now permits the corporation to make loans to officers or employees as long as the board of directors judges that the money is properly loaned to be used for the corporation. The board may act in good faith and without pecuniary interest, and there is no requirement that the loan be made to the corporation.⁴³³

1977 DEL. C. 10.

A. 1977 DEL. C. 10.

⁴³⁰ *Fiegler v. Lawrence*, 1981 Del. Ch. 213 (1976).

⁴³¹ *Bovay*, *supra* note 37 at 403.

⁴³² *Guth*, *supra* note 37 at 403. See also *Keenan v. Eshleman*, Del. Ch. 214 (1976).

⁴³³ *Del. Code Ann.*, Title 8, § 241, *supra* note 142 at 574.

The Court distinguished between corporate directors in a small corporation, who may become personally liable "whenever they foolishly or recklessly repose confidence in an untrustworthy officer or agent," and directors in a large corporation whose operation is hedged about with numerous and sometimes conflicting federal and state controls," to whom it held that it would not ascribe the same standards.⁴³⁷ The decision was consistent with the principle that duties of directors are related to day-to-day policy direction and control, the details of the business being entrusted to inferior officers, agents and employees.⁴³⁸

In *Zapata Corp. v. Maldonado*,⁴³⁹ the issue was whether a board of directors could bring a derivative suit brought by a dissenting shareholder against the corporation, alleging breaches of fiduciary duty. The Supreme Court, 5-4, 441 U.S. 352 (1979), held that such a suit could be brought by independent directors, and, in its opinion, noted that the suit was brought by a committee of independent

directors.

⁴³⁷ *Caahill v. Lofland*, Del. Ch., 114 A. 224 (1921).

⁴³⁸ *Maldonado v. Flynn*, 150 F. Supp. 24 (S.D.N.Y. 1957), rev'd in part, 321 F.2d 841 (2d Cir. 1963), *Maldonado v. Flynn*, 413 A.2d 1251 (Del. Ch. 1980), rev'd sub. nom. *Zapata v. Maldonado*, 450 A.2d 779 (Del. 1982). See also *supra* note 152 at 335.

⁴³⁹ The suit was after the derivative suit was commenced in Delaware and New York courts. Zapata's directors appointed a committee of independent directors. After an investigation the committee filed a report concluding that the shareholders' suits were without merit and that the corporation should not be liable. Based on that report, counsel for Zapata advised the directors that the suits in Delaware and New York,

o Zapata, *supra*, at 841-842.

ent, the Delaware court ⁴⁴² held that the corporation could not use such a procedure to frustrate the right of individual shareholders to bring a derivative suit.

On appeal, the Delaware Supreme Court rejected both conclusions. Neither does a shareholder possess an absolute right to initiate and maintain a derivative suit over the corporation's objection, nor does a fairness judgment ever prevent a court from reviewing a shareholder committee decision to terminate a derivative suit.

The court concluded that the "middle course" between both approaches was supported by a derivative suit to be deemed proper only if a report by an independent committee, the corporate committee's purported motion and the shareholder's response are considered by the court, and the findings are not subject to review.

Each step of the review is required to be based on the motion. Once the court has been satisfied that the independent committee report is not defective, the court must then consider the shareholder's motion. At the first step, the court must inquire into the independence of the committee, and the reasonableness of the shareholder's report. At the second step, the court must determine, "applying its own independent business judgment, whether the motion should be granted." And the court should, "when appropriate, give special consideration to matters of law and public policy in addition to the corporation's best interests."

⁴⁴² *Maldonado*, *supra* note 439 at 125.

1974. As a result of the combination of a corporation that was a subsidiary of the Board of Directors, and the merger of the corporation into a wholly owned subsidiary of other people. As a result of the merger, stockholders had received \$1.00 per share for their stock, which previously had been valued for approximately \$1.34 per share.

the discretion afforded by the board of directors under the business judgment rule, granted judgment for the defendants. However the Supreme Court reversed and found that the directors had breached their duty to make an informed decision about the merits of the merger.

The court's opinion focused on the inadequate procedures and missed information that the board used to evaluate the terms of the merger proposal. The board had agreed too hastily to the merger in an effort to respond to the plaintiff's demand for a rapid decision on the proposal. 448

"A director may not abdicate her fiduciary duty to act in an informed and deliberate manner in determining whether to approve an agreement of merger before submitting the proposal to the stockholders by leaving to the stockholders alone the decision to approve or disapprove the agreement." 449

After determining that the directors breached their duty of care by failing to act in an informed and deliberate manner, the court concluded that the plaintiff's claim for damages was not supported by adequate basis upon which to award damages. The court of the trial court remanded the case to the Delaware Court of Chancery to award damages. 450

In *Moran v. Household International Inc.*, 491 Delaware Courts upheld a

44. *Id.* at 171-72.

449 *Id.*

450 Damages were also awarded to the extent that the fair value of the stock exceeded \$5.00 per share. See *Smith*, *ibid*.

451 11 A 2d 1001 (Del. Ch. 1965), *aff'd*, 500 A 2d 1346 (Del. Sup. Ct. 1985).

corporate board's adoption of a "poison pill" as a valid exercise of its business judgment, even though they recognized that a "poison pill" may alter the balance of power between shareholders and the board of directors by making firms essentially takeover proof unless the acquisition has the approval of the incumbent management.⁴⁵²

"Preferred share purchase rights plan giving shareholders one right per common share upon announcement of tender offer for 50% of corporation's shares or acquisition of 40% of corporation's shares by any single entity or group was authorized by [board of directors] and constituted a legitimate exercise of business judgment by directors concerned over takeovers."⁴⁵³

Even though the Delaware Supreme Court upheld the validity of the "poison pill," it suggested that the discretion given to management under the business judgment rule might be accepted if managers failed to show that the "poison pill" was necessary to enhance corporate value to the shareholders.⁴⁵⁴ Thus, the Court declined to preclude the possibility that a firm with a "poison pill" could be acquired in an unfriendly takeover.⁴⁵⁵ A similar approach was adopted in *Revlon, Inc. v.*

*McAndrews & Forbes Holdings, Inc.*⁴⁵⁶

⁴⁵² *Dynamics Corp. of Am. v. CTS Corp.*, 704 F.2d 1048, 24 Ch. 770 (Cir. 1983). The "poison pill" was a device adopted by a board of directors without shareholder approval that attempts to deter or reverse hostile takeovers entitling the corporation's shareholders to receive additional shares of common stock (or other securities) at a bargain price.

⁴⁵³ *Moran*, *supra* note 451 at 130.

⁴⁵⁴ *Ibid.* at 130b-131.

⁴⁵⁵ *Ibid.* (Apr. 1, 1983) A-131-132 (1983).

to require courts to have upheld other controversial operations, with similar reservations. The use of corporate funds to acquire shares of dissident stockholder is not a proper exercise of "business judgment" if it is done to eliminate a threat to the future business or the existing policy of the company, and it is not "accomplished for the sole primary purpose of perpetuating the control of management." 456 Look ups (options to purchase stock) of corporations and related agreements are permitted where there is no deception, "sanctioned by director interest or other motive of temporary gain." 457

Looking down on the corporate level, the law is guided by the presence of independent directors, the corporate charter, the advice of outside bankers and lawyers, the protection of shareholders, the good faith and reasonable care of the corporation, and the absence of any threat to the corporation's future. 458

As to the law of the corporation, see "The Law of the Corporation."

The law of the corporation, which is the subject of this section, is not a new law, but a law which has been developed by the courts, pending or otherwise, and which is now being developed by the courts, administrative or

connection with that portion of his defense which was successful and litigation expenses may be advanced with the understanding that the advances will be repaid if the recipient is ultimately determined not to be entitled to indemnification.¹⁰⁰

The statute empowers a corporation to obtain insurance to protect anyone who can be indemnified, and who is protected against liability which the corporation would otherwise pay.¹⁰¹ Finally, the power to indemnify is declared to be non-exhaustive so that other rights to indemnification may be exercised by courts or by law in order to further non limited public policy.¹⁰² The statute is not intended to limit the power to require that an employer indemnify an employee.¹⁰³

It appears that the law is intended to protect the purpose of the indemnification law, which is to protect the employee from the financial consequences of a judgment against him, and to protect the employer from the financial consequences of a judgment against him. The provision does not require the employer to indemnify the employee for the full amount of the judgment, but only for the amount of the judgment which is not covered by the employee's own insurance.

100. *Id.* at 114.

101. *Id.* at 114. The statute provides that the corporation may obtain insurance to protect anyone who can be indemnified, and who is protected against liability which the corporation would otherwise pay.

considered proper. 472 Moreover, former directors have been held
liable for indemnification for legal fees and related costs incurred
in connection with their liability to the corporation for effort to
bring suit against the corporation. 473 When they recovered expenses of
the suit, they were not liable. 474

It is also possible that the corporation may be liable for the fees
of its directors, officers, and staff if any of the questions
arising from the suit are properly before the corporation. By the
time the suit is finally decided, the corporation may be liable for the
costs of the suit, and for the cost of the litigation imposed on the client,
and for the cost of the corporation's defense, and for the cost of the
litigation of the corporation.

McLean v. Alexander, 100 F.2d 844, 24 A.2d 844, rev'd

V. SUBORDINATION OF EMPLOYEES, OFFICERS, AND OTHERS

In *Lewis v. Corporation* (1954), the court held that the benefit of a stock option contract, which was made payable to the employee, was not a benefit of the corporation, but a benefit of the employee. The court held that the employee was entitled to the benefit of the stock option contract, and that the corporation was not liable for the payment of the stock option contract.

The court held that the employee was entitled to the benefit of the stock option contract, and that the corporation was not liable for the payment of the stock option contract. The court held that the employee was entitled to the benefit of the stock option contract, and that the corporation was not liable for the payment of the stock option contract.

The court held that the employee was entitled to the benefit of the stock option contract, and that the corporation was not liable for the payment of the stock option contract. The court held that the employee was entitled to the benefit of the stock option contract, and that the corporation was not liable for the payment of the stock option contract.

4. *Beard v. Elster, Inc.* (Supr., 160 A. 2d 311 (1956))

to examine the facts, content solely in sufficient examination to determine whether the terms of the option plan were so unequal as to amount to gifts, or whether the question was, so far as factually, as to fall within the realm of the exercise of sound business judgment. In the former case, the court will reverse the decision of the stockholder, in the latter it will not.¹⁴⁰⁶

In other words, if the stockholders, after a reasonable disclosure of all the facts, ratify the stock option plan approved by the board of directors, and the stockholder's decision is based on a fair and adequate understanding of the facts and circumstances, the court will not interfere with the decision of the stockholders. In **Forman v. Chesler**¹⁴⁰⁷ the court held that the stockholders, after a full and fair disclosure of the facts, had ratified the stock option plan. The court held that the stockholders, after a full and fair disclosure of the facts, had ratified the stock option plan. The court held that the stockholders, after a full and fair disclosure of the facts, had ratified the stock option plan.

¹⁴⁰⁶ See *Forman v. Chesler*, 100 F.2d 100, 101 (1st Cir. 1936).

¹⁴⁰⁷ *Forman v. Chesler*, 100 F.2d 100, 101 (1st Cir. 1936). The court held that the stockholders, after a full and fair disclosure of the facts, had ratified the stock option plan. The court held that the stockholders, after a full and fair disclosure of the facts, had ratified the stock option plan.

¹⁴⁰⁸ See *Pagostin v. Rice*, 100 F.2d 100, 101 (1st Cir. 1936). The court held that the stockholders, after a full and fair disclosure of the facts, had ratified the stock option plan.

¹⁴¹⁰ See *Michelson*, *supra* note 1408, at 101.

in death sick situations, and permit charter provisions which require more than a majority vote of directors for corporate action. 495

"The statute applies to the creation of "foreign corporations" and contains provisions applicable only to them. Therefore, a corporation must elect and obtain an identification number as a corporation prior to stating that it is a foreign corporation and only after it has obtained a special tax number designated for foreign corporations. Thus, the list of stock shall be filed with the corporation's first tax return, and on the corporation's first tax return, the corporation shall be required to file within the meaning of the Securities Act of 1933."

[illegible]

1. The first group of authors (e.g., [1, 2]) considers the problem of the stability of the motion of a system of particles in the case of a small perturbation of the initial conditions. The problem is solved by the method of the variation of constants. The results are obtained in the form of a series of powers of the perturbation parameter. The first group of authors also considers the problem of the stability of the motion of a system of particles in the case of a small perturbation of the initial conditions. The problem is solved by the method of the variation of constants. The results are obtained in the form of a series of powers of the perturbation parameter.

the Commission's findings that the Government's proposed remedy is largely directed at the interests of the Government and its employees, and that all of the employees are not equally affected, the Commission had to consider the impact of the proposed remedy on the interests of persons not employed by the FBI. The Commission's findings that the proposed remedy provides that all employees of the FBI are treated equally, and that no more restriction will be placed on the FBI's employment of U.S. citizens, does not change the fact that the proposed remedy is directed at the Government and voters of interest are not equally affected by the proposed remedy. The Commission's Act 1030, which provides that the Government is authorized to the United States to the proposed remedy, is directed at the Government, but not at the employees of the FBI. The Commission's proposed remedy is directed at the Government, but not at the employees of the FBI. The Commission's proposed remedy is directed at the Government, but not at the employees of the FBI.

management power is shifted from directors to stockholders, responsibility and liability are likewise shifted.

As a result, under the doctrine of *respondeat superior* or any provision that renders the directors liable on the ground that they are not exempted from responsibility as if they were a partnership, the directors are liable for the acts of the corporation, regardless of whether the directors are or are not shareholders. Thus, if a director is not a shareholder, he is not liable for the acts of the corporation, but if he is a shareholder, he is liable for the acts of the corporation. This is the doctrine of *respondeat superior* applied to the corporation. The corporation may be liable for the acts of its directors, and the directors may be liable for the acts of the corporation.

The doctrine of *respondeat superior* is applied to the corporation in the same manner as it is applied to the partnership. The corporation is liable for the acts of its directors, and the directors are liable for the acts of the corporation. This is the doctrine of *respondeat superior* applied to the corporation. The corporation may be liable for the acts of its directors, and the directors may be liable for the acts of the corporation.

The doctrine of *respondeat superior* is applied to the corporation in the same manner as it is applied to the partnership. The corporation is liable for the acts of its directors, and the directors are liable for the acts of the corporation. This is the doctrine of *respondeat superior* applied to the corporation. The corporation may be liable for the acts of its directors, and the directors may be liable for the acts of the corporation.

THE

THE

VI

DELAWARE'S LAW-MAKING PROCESS

I. LEGAL HISTORY AND "ECONOMIC" HISTORY

Criticism of Delaware Corporate Law originated in the work of scholars whose work has been focused on the historical analysis of the policy-making aspects of the legal system, and the relationship between that system and socio-economic changes. This movement has become an account of the manner in which interests groups are able to translate their desires into legislative actions.⁵⁰⁴ According to a theory of legislation that assumes that legal rules are demanded and supplied to any other commodity.⁵⁰⁵

⁵⁰⁴ Echebur, *supra* note 20 at 67.

⁵⁰⁵ Theory inspired in the articles of G. Stigler, "The Theory of Economic Regulation" (1971) 2 *Per. J. Econ. & Reg.* 261-5, C. Peltzman, "Towards a More General Theory of Economic Regulation" (1976) 19 *Am. Law & Econ.* 211, J. Macey, "Promoting Public Regardant Legislation Through Statutory Interpretation: An Interest Group Model" (1986) 15 *Conn. L. Rev.* 243, Landes & Posner, "The Independent Judiciary as an Interest Group Perspective" (1975) 14 *J. L. & Econ.* 375.

legislation is supposed to those groups that are positively and for it with compensation in the form of political support, campaign contributions, lobbying expenditures, and the like. The contours of a given law will therefore reflect a competitive equilibrium among the rival interest groups affected by the law. A further prediction is that laws will tend to benefit small, cohesive interest groups at the expense of the general public.

The second major criticism of the interest group theory of legislation is that it is too narrow. It focuses on the interests of organized groups, but ignores the interests of individuals. It also ignores the interests of the general public. The third major criticism is that it is too static. It assumes that the interests of groups are fixed and that the law is a reflection of these interests. In reality, the interests of groups are fluid and the law is a reflection of the current interests of the groups.

The fourth major criticism of the interest group theory of legislation is that it is too simplistic. It assumes that the law is a reflection of the interests of groups, but ignores the role of the courts. The courts play a significant role in the interpretation of the law and the resolution of disputes. The fifth major criticism is that it is too deterministic. It assumes that the law is a reflection of the interests of groups, but ignores the role of the legislature. The legislature plays a significant role in the creation of the law and the resolution of disputes.

The sixth major criticism of the interest group theory of legislation is that it is too narrow. It focuses on the interests of organized groups, but ignores the interests of individuals. It also ignores the interests of the general public. The seventh major criticism is that it is too static. It assumes that the interests of groups are fixed and that the law is a reflection of these interests. In reality, the interests of groups are fluid and the law is a reflection of the current interests of the groups.

The eighth major criticism of the interest group theory of legislation is that it is too simplistic. It assumes that the law is a reflection of the interests of groups, but ignores the role of the courts. The courts play a significant role in the interpretation of the law and the resolution of disputes.

The ninth major criticism of the interest group theory of legislation is that it is too deterministic. It assumes that the law is a reflection of the interests of groups, but ignores the role of the legislature. The legislature plays a significant role in the creation of the law and the resolution of disputes.

The tenth major criticism of the interest group theory of legislation is that it is too narrow. It focuses on the interests of organized groups, but ignores the interests of individuals. It also ignores the interests of the general public.

Delaware became almost "national" in status.¹⁰ Therefore, the "interest groups" (shareholders, minority, modern American corporate law are "made by management for management") that provided optimal business opportunities for promoters, directors, and officers.

Thus, Professor W. H. Rost declares that during each period of economic expansion it is cheapest and simplest to construct corporations in the performance of their functions. At least, these the capitalists were on duty, and therefore, companies are the product of a better than the representative class of the capitalists of the world.

The principle of the proposed super-resolution method based on the proposed deep sparse representation is shown in Fig. 1. When images are downsampled, the low-resolution images lose the required high-frequency information. The proposed method

[illegible]

entirely. The state of Delaware appears as a model but state with
 exceptional features and the large body of United American corporate law
 provisions, however, is not a perfect and ready set for the state of
 Delaware to provide a perfect policy.

1. *STATE OF DELAWARE* (1964) (1964) (1964) (1964) (1964) (1964) (1964) (1964) (1964) (1964)

The state of Delaware is a model but state with exceptional features and the large body of United American corporate law provisions, however, is not a perfect and ready set for the state of Delaware to provide a perfect policy.

The state of Delaware is a model but state with exceptional features and the large body of United American corporate law provisions, however, is not a perfect and ready set for the state of Delaware to provide a perfect policy.

The state of Delaware is a model but state with exceptional features and the large body of United American corporate law provisions, however, is not a perfect and ready set for the state of Delaware to provide a perfect policy.

supra note 1, at 100. The state of Delaware is a model but state with exceptional features and the large body of United American corporate law provisions, however, is not a perfect and ready set for the state of Delaware to provide a perfect policy.

[illegible]

$\{ \mathbf{y}_1, \mathbf{y}_2, \dots, \mathbf{y}_n \}$ is a linearly independent set in V if and only if $\{ \mathbf{y}_1, \mathbf{y}_2, \dots, \mathbf{y}_n \}$ is a linearly independent set in W .

It is not clear that a general theory of the law of the case doctrine is possible. *supra* note 11 at 514. The doctrine is a common-law doctrine, and common-law is the province of the courts. It is not possible to predict the outcome of a case.

[illegible]

1 1 1 1 1

But the people of the world are not so stupid as to believe anything is improved by the simple removal of the law to the bottom. They are a different group. They are intelligent. They believe especially in the rights of the individual. They are not going to be used to support corporate interests. They are going to protect themselves through the means of public ownership. They are going to take corporate interest and public control out of the hands of the monopolists and to make them part of the commonwealth. They are not going to be fooled. They would not have spent their money on this book.

of corporate law. Under the law, the right to litigate, but as a condition of the exercise of the right for the Delaware law.

The second approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law, and the law of the state of Delaware corporate law.

The third approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law.

The fourth approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law.

The fifth approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law. The sixth approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law. The seventh approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law.

The eighth approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law. The ninth approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law.

The tenth approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law.

The eleventh approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law.

The twelfth approach to stockholder litigation is to consider the law of the state of Delaware corporate law, as a matter of the state of Delaware corporate law, and the law of the state of Delaware corporate law.

Professor Romano points out that the most influential advisors to corporate management are generally the firms' lawyers.³⁴⁴ Delaware legal system is particularly attractive to corporate counsel because their expertise can be centered on one jurisdiction, especially one with the experience and importance of Delaware.³⁴⁵ Law firms within the state and around the country invest time and money in becoming experts on Delaware law.³⁴⁶

Moreover, professors Ravenna & Pothers' study reveals that no significant difference is predictable between the financial performances of corporations in "direct" and "liberal" states. The same proportion of successful and unsuccessful corporations occurred in both types of jurisdictions.³⁴⁷ Moreover, the financial performance of incorporated companies in the previous liberal states were not explained for either the number of incorporations, number of incorporations, or the ownership structure made in the jurisdiction.³⁴⁸ Pothers also left several reasons

³⁴⁴ See, e.g., Romano, *supra* note 1, at 107.
³⁴⁵ Romano, *supra* note 1, at 107. Romano also points out that firms begin to incorporate in Delaware because they are aware that "and on which they should not do the same." Romano, *supra* note 1, at 107.

³⁴⁶ Romano, *supra* note 1, at 107.

³⁴⁷ See, e.g., Harvey & Miller, *supra* note 1, at 407. The authors found that the financial performance of corporations was not significantly different between the two types of jurisdictions.

³⁴⁸ See, e.g., Romano, *supra* note 1, at 107. Romano also points out that the financial performance of corporations was not significantly different between the two types of jurisdictions. Romano, *supra* note 1, at 107. Harvey & Miller, *supra* note 1, at 407.

could reveal a change in ownership structure (from share dispersion to share concentration), that makes shareholder protection unnecessary. 537

The decision of where to incorporate or reincorporate is one of the important decisions the managers must make as agents for the firm and they have no incentive to insure themselves or the shareholders. Therefore, Delaware would have achieved its prominent position because of a "liberal" corporation law maximizes, rather than minimizes, shareholder welfare in corporations that incorporate or reincorporate there. 538

5. THE ATTRIBUTES OF DELAWARE

Other states could duplicate the Delaware corporate law in the statutory provisions involved in the judicial opinions. Nevada and New Jersey have followed this course, adopting both the Delaware statutory and case law to apply to corporations. 539

Delaware cannot be expected to maintain its dominant position. This position has been attributed to a "guarantee of stability." Delaware hopes that its corporation law will remain attractive to managers in

537. This would be the answer to the question: "Why are not all firms incorporated in Delaware?" (Raynolds & Butler, *supra* note 152 at 458).

538. Delaware's prominence would be attributed due to "success in a climb to the top rather than in a 'race to the bottom.'" Fischel, *supra* note 152 at 459. Asht, *supra* note 111.

539. Nev., *supra* note 141 at 665. Mass. & Miller, *supra* note 152 at 458. Comment, *supra* note 142 at 485.

the future. 540 That promise would have both a static and a dynamic element. The law will be stable in the sense that existing favorable rules will not be replaced for unfavorable ones, and also that the law will be flexible to respond to the market forces. 541

This "promise" would be bonded by the legislative and judicial process, criticized by Professor Cary. Delaware lawyers, judges and legislators are more knowledgeable about and have a greater interest in corporate law than do people with similar positions in other states. 542 They have the expertise to guide the development of corporate law consistently with principles of stability and flexibility, and the knowledge of the corporate structure and the market forces to make the right choice at the right moment. 543 Since other states cannot "improve" on similar aspects of corporate law, Delaware remains the national "leader" in corporate law.

IV. INTEREST GROUPS AND LAW MAKING PROCESS

A. RECONSTRUCTION OF DELAWARE LAW MAKING

544 Remains *supra* note 11, at 335. The promise is important because change in corporate law is made by the legislative process. Macey & Miller *supra* note 152 at 433.

541 Macey & Miller, *supra* note 152 at 433.

542 Macey & Miller, *supra* note 152 at 433. According to professor Fulk the Court of Chancery has been "hardly as independent and competent as judges in many of its decisions are now expected to be, and the quality of its thinking" on important issues that are of national importance is not as good as it was tested and made competent. *supra* note 152 at 433.

543 Macey & Miller, *supra* note 152 at 433.

and White & Wicks tested the following hypotheses in their study:
 H1: Experts use a narrower range of information when they decide whether to buy or
 (continued)

The results displayed a general absence of significant reactions to Delaware court decisions, and underscored the possibility that the market spurs might not be an appropriate technique for evaluating the consequences of judicial decisions. The researchers proposed two explanations for their findings:

1. Low- or zero-market reaction to corporate governance rules on a global level might have been caused by the small effect the value of them

2. Lack of capital flows

which is, among other things, due to the fact that changes in or differences in corporate governance rules may not be made public. Indeed, the majority of studies have shown companies often do not react to changes in the law, and when they do, they are slow to do so. If any decision affected companies, it might have been a large top-down decision that forced the price they were required to pay for the stock to change.

These studies also consider the impact of a sample of the Delaware Supreme Court cases, including *Singer v. Magnavox*, *Lynch I* and *Lynch II*, *Zapata Corp. v. Maldonado I* and *II*, and *Weinberger v. VOP Inc.* and *Unocal Corp. v. Mesa Petroleum Co.*

"*Singer v. Magnavox* is a market leader in that it appears that investors are not reacting to the case. The case was reported in the large financial press, but the market performance was not as volatile as might be expected if the case was a market leader."

In *Unocal v. Mesa Petroleum*, a sample of 100 companies was analyzed in Delaware and 100 companies incorporated outside of Delaware. They concluded that the market did not react to the case, and that the market is not reacting to the fact that the market is not reacting to the case.

It is not clear that the study of corporate law is a good way to study stock returns, and the study of corporate law is a good way to study market returns. The study of corporate law is a good way to study the period running from 1980 to 1990, leading to the 1990s.

Afterwards, the authors found that the market is reacting to stock returns in the sample, and the market is reacting to the 1990s. The results were summarized in a table, and a table of White & Weiss, *supra*, is included at 157.

more than in a free market, and therefore the
 corporate world would provide an accurate indicator of shareholder
 value and of corporate performance. But, of course, and such persons
 would not be able to make any such decisions, because they
 are not shareholders.

It is not clear, however, that the market is capable of evaluating the
 value of corporate performance. It is not clear, for example, that the
 market is capable of evaluating the value of corporate performance in
 terms of the value of the corporation that would be affected by such
 performance. It is not clear, for example, that the market is capable
 of evaluating the value of the corporation in terms of the value of the
 corporation's assets. It is not clear, for example, that the market is
 capable of evaluating the value of the corporation in terms of the
 value of the corporation's liabilities.

It is not clear, however, that the market is capable of evaluating the
 value of corporate performance. It is not clear, for example, that the

² See *Waller & Waller*, *supra* note 100 at 1051.

B. INDETERMINACY OF COURT DECISIONS

Professor Weir¹ and Watts² concluded that the nature of judicial decision in corporate cases makes it unlikely that the rule or rules a court applies in any given case will affect significantly the value of the stock of other companies eventually subject to these rules. Knowing what the value is in the absence of knowing that a court purported to rely on some rule or rules³ should, some case or cases, and not be attempted to follow one's pocket of votes and balance how that court or other court will deal with certain transactions.

Another reason one could not subject one's vote to the declared claims that the courts announce is that mean predictable differences in the means of substantial number of future corporate cases. All such cases involve transactions that are potentially detrimental to the firm, but that lawyers could have headed off. On the other hand the rules, and the shareholder opportunism and managerial discretion lead the court, to state contrarily any legal rule that can have substantial impact on corporate performance.

If the courts, in interest of protecting shareholders' rights, promulgate rules that allow any shareholder to challenge any transaction that arguably is adverse to his interest, some shareholders surely will react by behaving strategically, bringing suits and suits that will enable them to enrich themselves at the expense of the shareholder population as a whole. In addition, the threat of shareholder litigation will deter some managers from taking some prudent business risks or engaging in some potentially beneficial transactions with interested parties.

Suppose that members of the board would not review the substance of certain kinds of managerial decision. So as one kind of one specified decision-making procedure have been foreclosed, some members would be left by asking the other members to follow the recommended procedure in order to legitimate transactions in which they would not themselves incur decision-making expense.

One might also think that the board would not review the substance of certain kinds of managerial decision. So as one kind of one specified decision-making procedure have been foreclosed, some members would be left by asking the other members to follow the recommended procedure in order to legitimate transactions in which they would not themselves incur decision-making expense.

One might also think that the board would not review the substance of certain kinds of managerial decision. So as one kind of one specified decision-making procedure have been foreclosed, some members would be left by asking the other members to follow the recommended procedure in order to legitimate transactions in which they would not themselves incur decision-making expense.

See, e.g., *White & Weston*, *supra* note 560 at 569.

See *Young*, *supra* note 11 at 16. Although emphasizing the benefits of more vigorous and higher standards, A. A. Sommer recognized the cost of the price that is paid for such flexibility and adaptability of action. The inability to have complete and in condition of the state of affairs of the company which is most clearly delineated, sharply defined, and solidified. See *Young*, *supra* note 11 at 16.

The Court's customary policy on a combination of techniques. First, they are often prophesied by some authority or doctrine that some time or other, on the occasion, will be applied to particular set of facts. Some of the past history that in future cases the courts will reach results that expected; but the times might have a conclusion. Second, Court to make the most proper application that allows several different legal rules to be applied equally or based on the fact of most future cases. 1996. For past cases, when the Courts have dealt with future involving child labor, for cooperative business, they have based their decision either on whether the fact of future labor laws to be applied with or on view to the application of the law to be applied.

Delaware companies equally, making it impossible to isolate the Delaware effects on either Delaware or non-Delaware companies.

Fourth is different. Even though courts in other states often have looked to the Delaware courts' decisions for guidance as precedent especially when the Delaware courts have dealt with an issue that non-Delaware courts have yet to resolve, there is no reason to suppose that they would follow even a majority of Delaware doctrine in corporate law, particularly when Delaware courts have often chartered their approach. The nature of the corporate system does not reflect previsions for future uniformity in the corporate law of corporations.¹⁰⁷

4. *Legislation*

The Delaware law-making process reveals an active role of the corporation in the creation and amendment of legal rules. It is considered a core procedural feature of the Delaware corporate law have been influenced by the attitudes and opinions of a corporate person with an exceptional interest in the development of legal rules attractive for incorporation and investors.

Next, the Delaware corporate law is not the only group interested in the Delaware corporate law. Other groups participate in the law-making process and if the corporate law has prevailed up to the present, that does not mean that the other groups have been unable to impose some

¹⁰⁷ *White & Wicks, supra* note 60, at 603.

particular points of view or that legislators and judges follow any and all the advice of the corporate bar.

Moreover, even when the purposes of removal or incorporation have been achieved with a certain provision of law, the evolutionary nature of corporate law does not guarantee that the same provision will be construed in similar terms -- or that any given decision will influence all future decisions on issues involving similar facts. In this sense, court decisions are undetermined and are very unlikely to secure the purposes of a particular interest in corporate governance.

the power of Congress to regulate interstate commerce is not limited by the nature of Congress' incorporation in *McCulloch v. Maryland*.¹¹ Chief Justice Marshall stated that

the power of Congress to incorporate, though appearing to be confined to a single life, the power of making war, or buying and selling land, or the power to coin money, or to regulate the national commerce, though appearing to be confined to a single subject, are all powers which are incident to the power of regulating commerce. If the power of regulating commerce is not confined to a single subject, it is not confined to a single subject.

Chief Justice Marshall also stated that the power of Congress to regulate interstate commerce is not limited by the nature of Congress' incorporation in *McCulloch v. Maryland*. Chief Justice Marshall stated that the power of Congress to regulate interstate commerce is not limited by the nature of Congress' incorporation in *McCulloch v. Maryland*.

THEORY

The first part of the theory is the definition of the system. The system is defined as a set of elements that are interconnected in a specific way. The elements are represented by nodes, and the connections are represented by edges. The system is then analyzed in terms of its properties, such as its stability, its response to external inputs, and its internal structure. The analysis is done using a variety of mathematical tools, including differential equations, matrix algebra, and graph theory. The results of the analysis are then used to design a control system that can regulate the system's behavior.

The second part of the theory is the design of the control system. The control system is designed to regulate the system's behavior in a specific way. The design is done using a variety of mathematical tools, including differential equations, matrix algebra, and graph theory. The results of the design are then used to implement the control system. The implementation is done using a variety of hardware and software tools, including microprocessors, digital signal processors, and control software. The results of the implementation are then used to evaluate the performance of the control system.

$$f_1 = f_2 = \dots = f_{n-1} = 0, \quad f_n = 1$$
[illegible]

1. The first step in the process of the development of the new product is the identification of the market need.

2. The second step is the selection of the product concept and the determination of the product specifications.

3. The third step is the design of the product.

4. The fourth step is the development of the prototype and the testing of the product.

5. The fifth step is the production of the product.

6. The sixth step is the distribution of the product to the market.

7. The seventh step is the evaluation of the product and the determination of the product's success.

8. The eighth step is the termination of the product.

9. The ninth step is the evaluation of the product and the determination of the product's success.

10. The tenth step is the termination of the product.

11. The eleventh step is the evaluation of the product and the determination of the product's success.

12. The twelfth step is the termination of the product.

13. The thirteenth step is the evaluation of the product and the determination of the product's success.
